

566 Hegenberger Road, Oakland

2/4/91

1:29 Called Applied Geosystems to speak to Ken Mateik about ARCO #4494 566 Hegenberger Road. The secretary said Ken was out & that the branch manager Greg Barclay may be able to help me. I left a message for Greg to call me. Applied Geosystems #: (408) 264-7723

2/5/91

8:33 Per Dave Higgins of Applied Geo Systems, the report is being reviewed by ARCO

566 Hegenberges, Oakland

10/30/89

10:00 Spoke with Bill Dugan of Applied Geo Systems. He said a site safety plan was at the site with the driller.

10/31/89

morning

Bill Dugan called + said in drilling the well behind the gas tanks they encountered free product.

11/9/89

Bill Dugan called to say 2 wells had been installed they were having difficulty with installation of the 3rd well. Bill said there was a 5' difference in water levels in the two wells. Bill said there is black slag (?) fill on site + said a bay channel deposit is oriented toward a former chemical plant ~ 1/4 mile from the Area Station.

Bill also said the Nov. 10 report deadline would not be met.

Call Pacific Env. 3/6/89

~~2/16/88~~

Should receive:

Chain of custody  
TSDF to generator manifest copies  
Analytical results

for ARCO Waste Oil Tank Removal  
566 Hegenberger  
Oakland

Called 2/21/89

C+O said Pacific Environmental is doing the  
"consulting". Dwayne of C+O said he would call  
Pacific Env. & let them know to send info  
per p. 4<sup>4</sup> 22 of closure plan.

---

Wants to use soil from new pit to use as  
backfill of old excavation pit.

4 boring samples taken from new pit location

Need to see results & verify  $< 10 \text{ ppm TP} & \text{NO}$

for BTEX & verify that total volume of soils  
is not  $> 4 \times \underline{50} \approx 200 \text{ cu yds}$  & that the samples

represent this soil.

11:46

Spoke with Bill Dugan of Applied Geosystems

9/28/89

I recommended to him that all soil samples be analyzed for contaminants detected in the tank pull/soil excavation samples

(TPH G, TPH D, O+G, BTXE, Cr, Pb+Zn)

I recommended groundwater samples from all wells be analyzed for:

TPH G, TPH D, O+G, 8240, 8270 (+PCB, PCP, PNA & Croote), Metals (Cd, Cr, Pb, Zn)

Arco 566 Hegenberger Rd, Oakland 94621 11/8/88

3:00 Called Dwayne Liles of Crosby & Overton, to ask status of site. Dwayne said nothing has happened there yet. I reminded him to give us 2 days notice before any tank removal work is done on site.
