Phone call with Jim O'Laughlin who had questions regarding the public notification of potential case closure. Jim is with Save Our Sunol, an organization that has dealt with Hanson on other issues. Jim questioned why there had been no previous notification of the fuel release; they were unaware of the fuel leak case until now. In addition, the notification was not sent to Save Our Sunol but was forwarded to them by someone. I indicated that notification occurs either at the Corrective Action Plan phase or consideration of case closure. In this case, a formal Corrective Action Plan was not prepared; therefore, the notification of potential case closure was the only notification sent out. I encouraged him to comment on the notification process if he believed it was not sufficient. Jim also questioned why residual contamination would be left in place. We discussed general policy regarding low-risk closure. I offered to provide the Draft Low-Risk Closure Policy developed by the State Water Resources Control Board as a background document not as an official policy. The draft policy and some meeting notes from August 2011 were provided by email.
