Duration: 0 hours

Telephone conference call with Tina Lau of Hanson, Ron Goloubow of ARCADIS, and Caitlin Bell of ARCADIS regarding the Site Management Plan that ARCADIS is preparing.

Items discussed include:

Human health risk section can be brief with identification of potential pathways and comparison to ESLs and LTCO criteria.

Groundwater use section should discuss no extraction and withdrawal within area of plume and beyond. A buffer zone should be at least 1,000 feet from the plume and also a vertical distance for extraction.

The SMP may include a section that discusses future evaluation of site conditions when mining or development of the site is planned. Cannot predict when cleanup goals will be reached naturally so a site assessment would be advisable at the time of mining or development.

Jerry - we are starting to prepare a site management plan for the subject site. In an effort to save review time and revisions to the document, we wanted to discuss the scope of the document with you. Also we would like to introduce you to Ms. Tina Lau who has replaced Lee Cover at Hanson (Tina's contact information is attached). As such, are you available for a conference call at 1:00 PM on Wednesday April 10, 2013? Please let us know.

Thanks Ron.
