**Site Location: Holland Park Property, 16301 East 14<sup>th</sup> Street, San Leandro, California 94578**  
**Fuel Leak Case #RO0000212 and Geotracker Global ID # T0600100709**

**Summary** – This fact sheet has been prepared to inform community members and other interested parties of a plan to conduct a soil cleanup at a former bulk fuel storage facility at 16301 East 14<sup>th</sup> Street, San Leandro, California. The Hayward Area Recreation and Park District (HARD) and Alameda County Redevelopment Agency (RDA) have purchased the site of the former bulk fuel storage facility and plan to redevelop the site as a neighborhood park and community services center. Petroleum hydrocarbons are present in soil and groundwater within the area formerly used for the bulk fuel storage business. To address residual petroleum contamination in soil, HARD and RDA are planning to remove surface soils to a depth of one foot below ground surface throughout the area used for the former bulk fuel business and to cover the area with a minimum of one foot of clean, imported fill following the remedial excavation. Removal of the surface soils and covering the area with clean, imported fill will be implemented to prevent potential exposure to petroleum-hydrocarbon contaminated soils by future users of the park. Within two areas where contamination from underground storage tanks extends to greater depths, contaminated soils will be excavated and removed to depths up to 10 feet to remove soils which can act as a long-term source of contamination released to groundwater. Groundwater quality is expected to be restored by natural attenuation processes following the contaminated soil removal.

**Background** – This property was used for a bulk fuel storage business from around 1960 until the middle 1980s. Approximately 20 aboveground and 8 underground storage tanks of varying capacities were present at the site. The tanks contained gasoline, diesel fuel, kerosene, and Stoddard solvent. All tanks were removed from the site in 1998. Leakage and spillage from the tanks and dispensers during operation of the bulk storage facility resulted in soil and groundwater contamination. Environmental investigations have been conducted at the site from 1998 until the present to delineate and evaluate the contamination.

**Next Step** – The Hayward Area Recreation and Park District and Alameda County Redevelopment Agency are working with Alameda County Environmental Health (ACEH) to implement a soil cleanup at the site. The proposed soil cleanup is described in a report prepared by Amicus – Strategic Environmental Consulting on behalf of HARD entitled, “Corrective Action Plan,” and dated May 28, 2009. The public is invited to review and comment on the cleanup action proposed in this Corrective Action Plan. This report and the entire case file can be viewed over the Internet on the ACEH website (<http://www.acgov.org/aceh/lop/ust.htm>) or the State of California Water Resources Control Board Geotracker website (<http://geotracker.swrcb.ca.gov>). Please send written comments to Jerry Wickham at the address below; all comments will be forwarded to the responsible parties. **Comments received by July 30, 2009** will be considered and responded to prior to a final determination on the proposed cleanup.

Additional information: Contact Jerry Wickham of the Alameda County Department of Environmental Health, 1131 Harbor Bay Parkway, Alameda, CA 94502 at 510-567-6791 or by email at [jerry.wickham@acgov.org](mailto:jerry.wickham@acgov.org)
