Markus,

Your proposal to sample all wells after installation of the proposed additional wells and schedule are acceptable. Therefore, the revised ACEH due dates for technical reports are no later than:

January 23, 2009 – Site Assessment Report (with sampling results for all wells)
May 18, 2009 – First Quarter 2009 Groundwater Monitoring Report.

Regards,

Jerry Wickham

Subject: Holland Review & Schedule

Jerry:

Thanks very much for turning your review around so quickly. I've asked that Ninyo & Moore add the additional borings and analytes to their scope of services.

We plan on commencing the drilling in just a few weeks, and sampling the existing and new wells the week following well installation (early October).

We'd like the first sampling event to occur following well installation, with the site assessment report to present the results of this, and all the other, sampling. The assessment report should be complete mid- to late November.

Please let us know if this is an acceptable plan/schedule.

Thanks.

Markus
