Kris, P

Provided that the sampling locations shown in the attached report are representative of the soil that will be removed from the site, I do not see a need for additional sampling of potential fill material from the park site in East Oakland.

Regards,  
Jerry Wickham  
Alameda County Environmental Health

Jerry,  
Attached is a soil sampling report prepared by Baseline consulting from a site in East Oakland. There is also a due diligence section in the first few pages of the document that describes historic site use as agricultural until the 1950s and a recreation facility since then. Baseline based their sampling on the historical property use. I have also attached the analytical data associated with the sampling. We would like to use the soil from this site for the Holland project, and are prepared to do additional sampling and analysis to satisfy the DTSC requirements if need be. Please review this and let me know what you think.

Thanks,.

Kris M. Larson, P.G.
