Larry,

Thank you for providing the legal descriptions. We can now move forward with signing the "Covenant and Environmental Restriction on Property" (deed restriction) to move toward case closure. This will require signing of the deed restriction by a representative of HARD and the Director of my agency with notarization of both signatures. We do not have a notary at ACEH so you will need to provide a notary.

We can get the signing accomplished by either:

- 1) Meeting all together in the ACEH offices with a notary and having both parties sign at the same time.
- 2) You can sign the document with a Notary in your offices and then send the Notary over to the ACEH with document for signature by our Director here.

Either way, I will need to set up an appointment so that our Director is free to sign. Our Director will not be here the last week of September. Let me know if there is a day or two that is best on your end and I will check on getting an appointment sometime other than the last week of September.

Attached is the most current version of the deed restriction I have. Let me know if this is not correct.

After the deed restriction is signed and notarized, you will need to record it with the County Records office.

Regards,

Jerry,

As requested here is the parcel survey and legal description (Parcel B) for the Jack Holland Sr. Park. This is for the deed restriction that you are preparing. I also included the legal description (Parcel A) which is owned by the Redevelopment Agency. I thought you might need this in the future.

Larry Lepore
