

4-30-99 Todd @ Gettler-Ryan left mess. that the  
the new M.U's will be installed on 5/12.

3-18-99

Spoke to Todd at Gettler-Ryan. He said C-1 is screened at 18'-30" and C-2 is screened at 10'-28.5". Groundwater is at approx. 12'. We agreed that these wells should be closed out since they are not screened properly. He will send me a workplan to install replacement wells.

Spoke with Phil Briggs. After a long debate, we agreed to submit a workplan that includes installing a monitoring well with 15' of the downgradient location of the former underground tank.

3-25-99

Spoke with Todd @ Gettler-Ryan concerning the addendum to workplan dated 3-22-99. He said he will send me another Fig. 3, Well Construction detail that identifies monitoring wells C-1A, C-2A, C-4 and C-5 well constructed in this design. He will also send me a letter that ~~is~~ clarifying this issue.

12-17-98

Spoke to Todd Frate of Gettler-Peyan  
and asked him to send me a copy  
of the lab results and site plan  
identified in his letter to RWQCB  
dated 7-10-98
