Subject: RO225- Caltrans site on Hegenberger
Entry Type: Phone call
Company: Stantec

Start: Mon 2/11/2013 1:00 PM
End: Mon 2/11/2013 1:05 PM
Duration: 5 minutes

I received a call from Alicia Falk of Stantec Consulting Corporation regarding the Caltrans site on Hegenberger - RO225. She was inquiring on the status of the SCM with its' proposal of addressing data gaps at the site. I responded it was in the que. Ms. Falk indicated the funds for the proposed work would only be available for the current fiscal year.

I requested information on the status of the condition of the wells. Stantec reported that wells were damage by BART works who were using the former Caltrans site as a corporation yard for vehicle parking and material storage. The new BART extension connecting the Coliseum station to the Oakland airport goes down Hegenberger and passes the site. A subsequent GWM event did not document the damage as I had requested. Ms. Falk said they would provide details of the damage in the next semiannual GWM event.
