2-23-99 Met with Dean Breckbridge. He said he does not have the money to have additional samples taken for sampling of the groundwater. I told him if we can get more current groundwater data, it is possible to close out this site. He said the previous consultant, Certified Environmental Corp. has placed a lien on his property.

I told him I could contact RWQCB and see if they would accept data 5 years old since the level of contamination is ~~fairly~~ fairly low.

2-26-99 Left a mess. for Ed Hamilton of McCampbell. Analytical to review the chromatogram of Lab ID 31274 and 31275 to verify if an MTBE spike is present. Hamilton left mess. he looked at the chromatogram of Lab ID (S) 31270 } can't tell if MTBE is present

- (S) 31271
- (S) 31272
- (S) 31273
- (W) 31274
- (W) 31275

Strong possibility MTBE is present, there are peaks in the area.

(S) soil sample
(W) water sample

3-18-98

Leon Breckenridge could not be contacted at 654-9734 (# disconnected) or 655-7361 (wrong #) Message was left on the answering machine to contact Camy Seto. If the R.P. could be located, a letter needs to sent to get on update. U.G.T. locations need to be I.D., more soil samples and water samples may have to be taken. Attempt to get a water sample should be in the 1st quarter to have a better chance of collecting a sample through the hydrograph screen.

4-5-98

Went to the site. There were cars in the gravel of the building in the fenced in parking lot. The business was not open at the time I was there 9:30 AM. It appears that the business is still in operation.

2-10-99

Went by site and found them open. I met with Dean Breckenridge, the owners son. He showed me where the ~~the~~ ^{samples/boxes} were located, and I schedule a meeting with him on 2/18 to go over their site investigation.
