I received a call from Eric Silverman, agent for Buyer and Seller. Wanted to know status of the site. I told him that USTs were removed in 1992 and one round of site investigation, which discovered free product, was conducted in 1994. The site was accepted into the cleanup fund, however, LOC expired due to inactivity on the RP's part.

I encouraged Eric to review the case file on our website, including our directive letters, check with an environmental attorney regarding Exxon Mobile's liability for the site, since it appears that they were never on title for the property, and contact the UST cleanup fund regarding reinstating eligibility for cost reimbursement.
