Hello Jerry,

I want to notify you that the Permeable Reactive Barrier Trench (workplan dated November 28, 2011) for hydrocarbon contamination treatment at the Redwood Park Service Yard was successfully installed this November-December 2013.

Documentation of the installation and the 30-day post-installation sampling of key wells will be included in the 2nd Semiannual Groundwater Monitoring and Annual Summary Report that should be completed by mid-January 2014.

Regards and happy Holidays

HENRY PIETROPAOLI, P.G.
