July 29, 2010

Mr. Nghiep Hua 450 37th St. Oakland, CA 94609

Subject: Property Access by the Parties Responsible for the Investigation and Cleanup of Petroleum Hydrocarbon Contamination at Fuel Leak Case No. RO0000251 and Geotracker Global ID T0600101472, Unocal #3538, 411 W MacArthur Blvd., Oakland, CA 94609

Dear Mr. Hua:

Alameda County Environmental Health (ACEH) is overseeing the investigation and cleanup of total petroleum hydrocarbons as gasoline, benzene and methyl tertiary butyl ether contamination released from underground storage tanks at the subject site. We are uncertain as to how far the contamination from those tanks has moved.

ACEH is requiring ConocoPhillips to investigate and clean up contaminated soil and groundwater at the site to prevent the hydrocarbon contamination from spreading to other properties or to drinking water sources and reduce the potential threat to human health and the environment. To properly determine the extent of that contamination in groundwater, ConocoPhillips must perform additional off-site investigation. Therefore, we need your help in allowing access to your property by ConocoPhillips to properly define the extent of contamination.

If you have any questions, please call Jan Wagoner at Delta Environmental at (916) 503-1275.

Sincerely,

Barbara Jakub, P.G. Hazardous Materials Specialist
