Fuel Leak Case No. RO0000253
GeoTracker Global ID #T0600101467

I have reviewed the attached report dated July 13, 2015.

I agree with the conclusions and recommendations presented in the referenced report. The information in this report is accurate to the best of my knowledge and all local Agency/Regional Board guidelines have been followed. This report was prepared by AECOM, upon whose assistance and advice I have relied.

This letter is submitted pursuant to the requirements of California Water Code Section 13257(b)(1) and the regulating implementation entitled Appendix A pertaining thereto.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge.

Sincerely,

Nicole Arceneaux
Project Manager

Subject: **Site Assessment Report**
Unocal No. 5781 (351640)
3535 Pierson Street, Oakland, California
Fuel Leak Case No. RO0000253
GeoTracker Site ID T0600101467

Dear Mr. Nowell,

On behalf of Chevron Environmental Management Company's (EMC's) affiliate, Union Oil Company of California ("Union Oil"), AECOM is pleased to present this Site Assessment Report for the above-referenced site. In correspondences dated January 8, 2015 and April 16, 2015, Alameda County Environmental Health (ACEH) concurred with AECOM's December 23, 2014 Data Gap Investigation Work Plan and AECOM's response to ACEH's technical comments (**Attachment A**).

BACKGROUND

Site Location

The site is an active service station located at the northwestern corner of the intersection of Pierson Street and MacArthur Boulevard in Oakland, California (**Figure 1**). The current site configuration includes a station building, two 12,000-gallon gasoline underground storage tanks (USTs), and four dispensers on two islands (**Figure 2**). The station building consists of a market/deli (formerly a vehicle repair shop) and an office area. A City of Oakland sewer easement crosses the west and southeast corner of the Site (Delta 2011).

The site is located in a primarily residential area. To the north of the site is an off-ramp for east-bound Interstate 580, to the east is MacArthur Boulevard and the Julia Morgan School for Girls (Mills College), to the south is Pierson Street and residential apartments, and to the west is the parking lot for the Kingdom Hall of Jehovah's Witnesses. The entire site, with the exception of planter areas along the perimeter, is paved with concrete and asphalt.

Site Geology and Hydrogeology

The site is located on the western flank of the Oakland Hills which are underlain by the Quaternary San Antonio Formation and Holocene alluvium of the Temescal Formation. The San Antonio Formation consists of gravels with a silt and clay matrix. The Temescal Formation consists of alluvial deposits composed of unconsolidated, moderately sorted permeable silt with coarse sand and gravel (California Geological Survey 2002; 2010).

The majority of the site is underlain by fine-grained relatively low-permeability silt and clay which contain scattered deposits of clayey sand and silty sand to the depth explored. A zone of "well graded" and "poorly graded" gravel with silt and sand between 14 to 18 feet below ground surface (bgs) was described in boring logs for MW-2, MW-A, SB-3, and SB-6. A similar, more permeable zone within the same depth range was described as clayey sand with gravel and sandy clay from boring logs for MW-9 and MW-5, respectively.

The site is located in the Santa Clara Valley Groundwater Basin and the East Bay Plain Subbasin (DWR 2004). Groundwater appears to be locally semi-confined. Several borings drilled to the same depth as water observed in site monitoring wells were dry. Additionally, groundwater in all monitoring wells purge dry during sampling and are very slow to recover (greater than 2-hour recovery time). Due to the slow recovery, no purge samples are collected and submitted for laboratory analysis if the wells do not recharge.

A re-evaluation of historical groundwater contours and the most current contour by AECOM with all given data points within the same relative shallow aquifer suggests the site is in an area of groundwater convergence with a generally east/southeast trending swale which is consistent with the site's topographic setting. The presence of this swale leads to shifts in the groundwater flow direction and the groundwater elevations rise and fall.

UST History

In 1967, one 10,000-gallon premium gasoline UST, one 10,000-gallon unleaded gasoline UST, and one 280-gallon waste-oil UST were installed at the site. In December 1989 the two 10,000-gallon fuel USTs, one the 280-gallon waste-oil UST, and associated product piping was removed. The second generation waste-oil UST was installed at the rear of the station building. Seven confirmation soil samples were collected from the gasoline UST excavation and product piping trench.

In April 2008, the second-generation waste-oil UST was removed and four soil samples (WO1-WO4) were collected from the excavation. The samples were all non-detect for all analysis; therefore, no over-excavation was conducted. The stockpiled soil was backfilled into the tank cavity following receipt of the laboratory results and the tank was not replaced.

Assessment History

Since 1990, various consultants have advanced 15 soil borings (MW-1 through MW-3, EB1, EB2, SB-1 through SB-8, SWC-2, SWD-2) and installed 7 groundwater monitoring wells (MW-A, and MW-4 through MW-9) and collected soil samples during UST removal activities at the site (**Figure 2**). Based on historical analytical data, data gaps were identified in the analysis of the first generation former waste oil tank.

Groundwater monitoring has been conducted quarterly for all site wells since their installation. During the fourth quarter of 2012, 0.39 feet of free product was observed in well MW-5. Free product has not been observed in MW-5 since that time. Currently, hydrocarbons in groundwater have not been delineated down-gradient of MW-5 for all groundwater flow directions.

Remediation History

In February 1990, the waste oil UST pit was over-excavated to 16 feet bgs. The excavation was reported to extend 35 feet to the east, 10 feet to the west, 15 feet to the south, and 2 feet to the

north from the waste oil UST location. Approximately 50 cubic yards of soil were removed. Further excavation was not possible due to utility lines in the area. The gasoline UST pit was not over-excavated due to low concentrations on the side walls and bottom of the excavation. No holes or cracks were observed in the gasoline USTs. After confirmation sampling approximately 5,000 gallons of groundwater were removed from the excavation and disposed of offsite.

In April 2010, a portion of the sidewall of manhole cover #2 (MH-2) , located approximately 10 feet west of MW-4, was observed to be leaking liquid into the storm drain. Innovative Construction Solutions (ICS) placed a permanent patch on the portion of the storm drain that had been identified to be seeping water into the storm drain. Follow-up inspections and PID observations of the manhole repair indicated the repair was intact and no further water was seeping into the storm drain manhole.

SITE ASSESSMENT

This site assessment was focused on two site areas based on the remaining site data gaps presented in the ACEH email dated April 10, 2014.

AECOM advanced six soil borings, three in the area of the first generation waste oil tank and three to the east of MW-5. The actual locations of the soil borings varied slightly from the proposed locations based on underground utilities and accessibility.

Pre-field Activities

Prior to the site assessment activities, AECOM performed the following activities:

- Developed a health and safety plan that incorporated the proposed assessment tasks and requirements for the types of personal protective equipment to be used, air monitoring requirements, and potential chemical exposure hazards;
- Obtained the necessary permits from Alameda County Public Works Agency (ACPW) (**Attachment B**);
- Obtained the necessary encroachment permits from the California Department of Transportation (**Attachment B**);
- Delineated the proposed locations in white paint and notified Underground Service Alert of Northern California at least 48 hours prior to conducting the work;
- Utilized a private utility locator to check for subsurface utilities; and
- Notified ACEH and relevant stakeholders of the field schedule at least 72 hours prior to conducting the field work.

Soil Assessment

On June 16 and 17, 2015, AECOM supervised the advancement of six soil borings to between 18 and 24 feet bgs. The soil borings were advanced using hand-auger techniques to 8 feet and then with direct-push technology to either refusal depth or the target depth. The boreholes were backfilled after the ACPW grout inspector arrived on site with cement grout and the surface was completed to match the existing surface in that area.

The soil lithology observed in the six soil borings was generally similar to previous site investigations. The zone of coarser material present from 14-18 feet was only observed in SB-12 and SB-13, past investigation and water yield indicate that this layer is not continuous across the site. Silts and lean clays are the most common soil types encountered and were typically very dense and dry. Boring logs are included as **Attachment C**. AECOM submitted well completion reports to the Department of Water Resources.

Soil samples were submitted to BC Laboratories (BC Labs), a California State-certified laboratory, using standard chain-of-custody and sample preservation methods. The BC Labs analytical report dated July 2, 2015, is included as **Attachment D**. All samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline (TPHg), TPH as diesel (TPHd), and TPH as motor oil (TPHmo) by Environmental Protection Agency (EPA) Method 8015; volatile organic compounds (VOCs) using EPA Method 8260B, and semi-volatile organic compounds (SVOCs) by EPA 8270C.

Based on the analytical results from the samples collected from soil borings SB-10 through SB-15, TPHg, BTEX, SVOCs, and oxygenates were not detected above laboratory reporting limits.

Analytical results from the soil borings near the first generation waste oil tank, SB-10, SB-11, and SB-12, detected TPHmo at all locations, see below. Based on the concentrations in SB-10 and SB-12, TPHmo is laterally delineated to below the San Francisco Bay Regional Water Quality Control Board (SFBRWQCB) Environmental Screening Levels, May 2013 update (ESLs). Vertical delineation was encountered at SB-10 through SB-12 based on non-detect concentrations of all constituents, see below and **Tables 1, 2, and 3**.

Soil Boring	Sample Depth (ft bgs)	Date	TPHd (mg/kg)	TPHmo (mg/kg)
SB-10	2	6/16/2015	<2.0	6.7
	5	6/16/2015	<2.0	<4.0
	10	6/16/2015	<2.0	<4.0
	14.5	6/16/2015	<2.0	<4.0
SB-11	2	6/16/2015	<170	1,300
	5	6/16/2015	<190	2,600
	10	6/16/2015	370	6,100
	15	6/16/2015	<2.0	<4.0
SB-12	2	6/16/2015	<2.0	6.1
	5	6/16/2015	<2.0	27
	10	6/16/2015	<2.0	<4.0
	15	6/16/2015	<2.0	<4.0

Off-site soil concentrations were only found in SB-13 and SB-14. In SB-13 the only detection was within the wet soil located at the observed water table and indicative of groundwater not soil concentrations. In SB-14, there were detections of TPHmo and TPHd that were below ESLs sporadically observed, see below and **Tables 1, 2, and 3**.

Soil Boring	Sample Depth (ft bgs)	Date	TPHd (mg/kg)	TPHmo (mg/kg)
SB-13	2	6/16/2015	<2.0	<4.0
	5	6/16/2015	<2.0	<4.0
	10	6/16/2015	<2.0	<4.0
	12	6/16/2015	<2.0	<4.0
	17	6/16/2015	<2.0	<4.0
	19	6/16/2015	<2.0	<4.0
SB-14	2	6/16/2015	<10	65
	5	6/16/2015	<2.0	14
	10	6/16/2015	<2.0	<4.0
	14	6/16/2015	<2.0	<4.0
	16	6/16/2015	3.6	7.4

Groundwater Assessment

AECOM attempted to collect grab groundwater samples from each soil boing location by installing a temporary 1-inch polyvinyl chloride (PVC) well with 10 feet of screen into each borehole. Only SB-11 and SB-13 had initial indication of groundwater in the soil. The temporary wells were left in SB-10, SB-12, and SB-15 overnight to allow water to accumulate. Water samples were collected from SB-11 and SB-13, the other 4 wells were completely dry after being left open overnight.

Groundwater was observed at approximately 15 feet bgs in both SB-11 and SB-13. The groundwater in SB-11 appeared to be perched water within the previous excavation backfill since groundwater was only observed at the excavation backfill/native soil interface and no indication of groundwater was observed in nearby borings SB-10 and SB-12. In soil boring SB-13, the groundwater recharged and is indicative of site groundwater though likely skewed high as the samples were collected with high turbidity. Historically at this site some of the soil borings and attempted monitoring wells have been dry.

Groundwater samples were submitted to BC Labs, a California State-certified laboratory, using standard chain-of-custody and sample preservation methods. The BC Labs analytical report dated July 2, 2015, is included as **Attachment D**. All samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline (TPHg), TPH as diesel (TPHd), and TPH as motor oil (TPHmo) by Environmental Protection Agency (EPA) Method 8015; volatile organic compounds (VOCs) using EPA Method 8260B, and semi-volatile organic compounds (SVOCs) by EPA 8270C.

The groundwater sample collected at SB-11 had detections of TPHmo and TPHd, the remaining constituents were not detected above laboratory detection limits. Since this sample was located in the prior excavation backfill the groundwater results are not indicative of groundwater in the area. The main constituent detected in SB-13 was TPHg. Benzene and MTBE were not detected above laboratory reporting limits. Besides the constituents detected above laboratory reporting limits in the table below, only naphthalene and 2-Methylnaphthalene exceed the ESLs. Groundwater analytical results are provided in **Tables 4, 5, and 6**.

Well ID	Date	TPH-g ($\mu\text{g}/\text{L}$)	TPH-d ($\mu\text{g}/\text{L}$)	TPH-mo ($\mu\text{g}/\text{L}$)	Benzene ($\mu\text{g}/\text{L}$)
SB-11	6/16/2015	<250	330	500	<0.50
SB-13	6/17/2015	44,000	<2,000	<5,000	<2.5

Waste Characterization and Disposal

One 55-gallon Department of Transportation-approved drum containing soil was generated during the site assessment activities. The drum will be transported to a licensed disposal facility under waste manifest documentation.

Conclusions and Future Activities

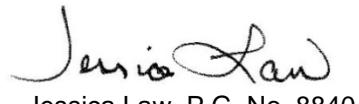

The Site Conceptual Model (SCM) will be updated with the results of this site assessment. AECOM would like to request a meeting with ACEH during the third quarter 2015, prior to submitting the updated SCM, to cooperatively work on path forward towards site closure.

If you have any questions regarding this project, please contact James Harms of AECOM at (916) 414-5800.

Sincerely,

James Harms

Subject: Work Plan Approval -Fuel Leak Case RO253 and GeoTracker Global ID T0600101467, Unocal #5781, 3535 Pierson St., Oakland
Date: Thursday, April 16, 2015 2:38:13 PM
Attachments: [Attachment 1 and ftpUploadInstructions_2014-05-15.pdf](#)

Dear Ms. Arceneaux:

Alameda County Environmental Health (ACEH) has reviewed the case file and the recently submitted document *Response to Technical Comments* (RTC), provided to ACEH via email, dated April 15, 2014, and prepared by AECOM for the subject site. The RTC addresses the four Technical Comments presented in the ACEH correspondence dated January 8, 2015.

In addition to the Technical Comments provided in the January 8, 2015 correspondence, ACEH requested the AECOM document entitled *Data gap Investigation Work Plan* (Work Plan), dated December 23, 2014, be uploaded to the ACEH ftp website. At this time the requested document has not been uploaded. Therefore, if not already submitted, please upload the document prepared for the subject site by the date specified below.

The RTC is in agreement with ACEH's January 8, 2015 Technical Comments addressing the soil and groundwater sampling and the analysis scope. Submittal of a revised work plan is not required provided that the modifications presented in the RTC are incorporated in to the AECOM December 23, 2014 Work Plan. ACEH requests that you perform the proposed work, and send us the technical reports described below.

Please provide ACEH with at least three (3) business days notification prior to conducting the fieldwork. ACEH requests that future communications include the ACEH case file number in the subject line.

Technical Report Request

Please upload technical reports to the ACEH ftp site (Attention: Keith Nowell), and to the State Water Resources Control Board's Geotracker website, in accordance with the following specified file naming convention and schedule:

- **May 1, 2015– Data Gap Investigation Work Plan - ACEH ftp website only (file name: RO0000253_WP_R_yyyy-mm-dd)**

- **July 15, 2015– Soil and Groundwater Investigation (file name: RO0000253_SWI_R_yyyy-mm-dd)**

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23 CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

Thank you for your cooperation. ACEH looks forward to working with you and your consultants to advance the case toward closure. Should you have any questions regarding this correspondence or your case, please call me at (510) 567-6764 or send an electronic mail message at keith.nowell@acgov.org.

Respectfully,
Keith Nowell P.G., C.HG.

Attachment: Responsible Party(ies) Legal Requirements/Obligations
ACEH Electronic Report Upload (ftp) Instructions

From: [Nowell, Keith, Env. Health](#)

Subject: Fuel Leak Case RO253 Unocal #5781, 3535 Pierson St., Oakland
Date: Thursday, January 08, 2015 9:14:50 AM

Dear Ms. Arceneaux:

Alameda County Environmental Health (ACEH) has reviewed the document *Data Gap Investigation Work Plan* (Work Plan) dated December 23, 2014 and prepared by AECOM for the subject site. This report has only been submitted to Geotracker and has not been submitted to the County. Please additionally submit an electronic copy to ACEH.

The Work Plan addresses many of ACEH's technical comments presented during a meeting held on August 4, 2014.

Based on ACEH staff review of the referenced document and of the case file, we generally concur with the recently proposed scope of work, provided that the modifications requested in the technical comments below are addressed and incorporated during the field implementation. While the comments below request a number of additional analyses, submittal of a revised Work Plan is not required unless an alternate scope of work outside that described in the Work Plan and technical comments below is proposed. We request that you address the following technical comments and send us the technical reports requested below. Please provide 72-hour advance written notification to this office (e-mail preferred to: keith.nowell@acgov.org) prior to the start of field activities.

Technical Comments:

AECOM proposed scope of work:

1. First Generation Waste Oil Tank Assessment- The proposed work included the collection of soil samples at intervals of 2, 5, and 10 feet below the ground surface (bgs) from three borings.

ACEH requests that one soil sample be recovered from each soil bore in the 0- to 5-feet bgs and the 5- to 10 feet bgs intervals. Soil samples should also be recovered at areas of obvious contamination, the soil/groundwater interface, and at significant changes in lithology. The samples recovered are requested to be collected from at least two different depths within the 0- to 5-foot and from the 5- to 10 foot intervals in addition to the top of the soil/groundwater interface. If staining, odor, or elevated PID readings are observed over an interval of several feet, a sufficient number of soil samples from this interval should be submitted for laboratory analyses to characterize the fuel hydrocarbon concentrations within this interval. Please ensure that the analytical results define the vertical and horizontal extent of TPH impacts at the site.

As discussed in the meeting, ACEH is of the opinion that EB1 and EB2 groundwater samples may have been diluted as the depth of the recovered samples is significantly deeper than the depth to water reported for the site. Groundwater at the site ranges from 10.53 feet below the ground surface (bgs) to 19.55 feet bgs, but is typically in the range of 11 feet bgs to 16 feet bgs. ACEH requests that the soil boings associated with the waste oil tank investigation be advanced to a depth sufficient to collect grab groundwater samples. Please analyze grab groundwater samples for total petroleum hydrocarbons (TPH) as gasoline (TPHg) , TPH as diesel (TPHd), TPH as motor oil (TPHmo), benzene, toluene, ethylbenzene, and xylenes (BTEX), methyl tertiary butyl ether (MTBE), the full suite of volatile organic compounds (VOCs), and semi-volatile organic compounds (SVOCs).

2. **Down Gradient Soil and Groundwater Assessment**- The proposed work included the collection of soil samples at 5-foot intervals beginning at 5 feet bgs. The Work Plan does not specifically address if the soil samples will be submitted to an analytical laboratory for analysis.

ACEH requests that one soil sample be recovered from each soil bore in the 0- to 5-feet bgs and the 5- to 10 feet bgs intervals, at areas of obvious contamination, the soil/groundwater interface, and at significant changes in lithology. The samples recovered are requested to be collected from at least two different depths within the 0- to 5-foot and from the 5- to 10 foot intervals in addition to the top of the soil/groundwater interface. If staining, odor, or elevated PID readings are observed over an interval of several feet, a sufficient number of soil samples from this interval should be submitted for laboratory analyses to characterize the fuel hydrocarbon concentrations within this interval. Please ensure that the analytical results define the vertical and horizontal extent of TPH impacts at the site. Analyze the soil samples for TPHg, TPHd, TPHmo, BTEX, and MTBE.

Please analyze grab groundwater samples for TPHg, TPHd, TPHmo, BTEX, and MTBE.

3. **Sample Analysis**- The proposed scope of analysis for all samples included TPHg, TPHd, and total oil and grease (TOG) analysis using United States Environmental Protection Agency (EPA) test method 8015.

As discussed above, please substitute the TOG analysis with the analysis for motor oil (TPHmo) by EPA method 8015.

4. **Reporting**- As discussed in the meeting, please include a figure using an aerial photographic base showing the existing and currently proposed boring and groundwater sampling point locations and the nearby Julia Morgan School for Girls.

Please electronically submit the report summarizing the investigation results to both the ACEH ftp and the GeoTracker websites. In addition to the report document, the electronic submittal of information (ESI) to GeoTracker should also include individual files for lab data in Electronic Deliverable Format (EDF) and a GEOMAP.

Technical Report Request

Please upload technical reports to the ACEH ftp site (Attention: Keith Nowell), and to the State Water Resources Control Board's GeoTracker website, in accordance with the following specified file naming convention and by the schedule identified below:

- **May 7, 2015 – Soil and Groundwater Investigation** (file name: RO0000253_SWI_R_YYYY-MM-DD)

These reports are being requested pursuant to California Health and Safety Code Section 25296.10. 23

CCR Sections 2652 through 2654, and 2721 through 2728 outline the responsibilities of a responsible party in response to an unauthorized release from a petroleum UST system, and require your compliance with this request.

Online case files are available for review at the following website: <http://www.acgov.org/aceh/index.htm>.

Thank you for your cooperation. ACEH looks forward to working with you and your consultants to advance the case toward closure. Should you have any questions regarding this correspondence or your case, please call me at (510) 567-6764 or send an electronic mail message at keith.nowell@acgov.org.

Respectfully,
Keith Nowell

Boreholes

Specific Work Permit Conditions

1. Backfill bore hole by tremie with cement grout or cement grout/sand mixture. Upper two-three feet replaced in kind or with compacted cuttings. All cuttings remaining or unused shall be containerized and hauled off site. The containers shall be clearly labeled to the ownership of the container and labeled hazardous or non-hazardous.

2. Boreholes shall not be left open for a period of more than 24 hours. All boreholes left open more than 24 hours will need approval from Alameda County Public Works Agency, Water Resources Section. All boreholes shall be backfilled according to permit destruction requirements and all concrete material and asphalt material shall be to Caltrans Spec or County/City Codes. No borehole(s) shall be left in a manner to act as a conduit at any time.

3. Permittee shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend and save the Alameda County Public Works Agency, its officers, agents, and employees free and harmless from any and all expense, cost, liability in connection with or resulting from the exercise of this Permit including, but not limited to, properly damage, personal injury and wrongful death.

4. Applicant shall contact assigned inspector listed on the top of the permit at least five (5) working days prior to starting, once the permit has been approved. Confirm the scheduled date(s) at least 24 hours prior to drilling.

5. Copy of approved drilling permit must be on site at all times. Failure to present or show proof of the approved permit application on site shall result in a fine of \$500.00.

6. NOTE:

Under California laws, the owner/operator are responsible for reporting the contamination to the governmental regulatory

Alameda County Public Works Agency - Water Resources Well Permit

agencies under Section 25295(a). The owner/operator is liable for civil penalties under Section 25299(a)(4) and criminal penalties under Section 25299(d) for failure to report a leak. The owner/operator is liable for civil penalties under Section 25299(b)(4) for knowing failure to ensure compliance with the law by the operator. These penalty provisions do not apply to a potential buyer.

7. Prior to any drilling activities onto any public right-of-ways, it shall be the applicants responsibilities to contact and coordinate a Underground Service Alert (USA), obtain encroachment permit(s), excavation permit(s) or any other permits required for that City or to the County and follow all City or County Ordinances. It shall also be the applicants responsibilities to provide to the Cities or to Alameda County a Traffic Safety Plan for any lane closures or detours planned. No work shall begin until all the permits and requirements have been approved or obtained.

8. Backfill bore hole by tremie with cement grout or cement grout/sand mixture. Upper two-three feet replaced in kind or with compacted cuttings. All cuttings remaining or unused shall be containerized and hauled off site. The containers shall be clearly labeled to the ownership of the container and labeled hazardous or non-hazardous.

9. Boreholes shall not be left open for a period of more than 24 hours. All boreholes left open more than 24 hours will need approval from Alameda County Public Works Agency, Water Resources Section. All boreholes shall be backfilled according to permit destruction requirements and all concrete material and asphalt material shall be to Caltrans Spec or County/City Codes. No borehole(s) shall be left in a manner to act as a conduit at any time.

10. Permittee shall assume entire responsibility for all activities and uses under this permit and shall indemnify, defend and save the Alameda County Public Works Agency, its officers, agents, and employees free and harmless from any and all expense, cost, liability in connection with or resulting from the exercise of this Permit including, but not limited to, properly damage, personal injury and wrongful death.

11. Applicant shall contact assigned inspector listed on the top of the permit at least five (5) working days prior to starting, once the permit has been approved. Confirm the scheduled date(s) at least 24 hours prior to drilling.

12. Copy of approved drilling permit must be on site at all times. Failure to present or show proof of the approved permit application on site shall result in a fine of \$500.00.

13. NOTE:

Under California laws, the owner/operator are responsible for reporting the contamination to the governmental regulatory agencies under Section 25295(a). The owner/operator is liable for civil penalties under Section 25299(a)(4) and criminal penalties under Section 25299(d) for failure to report a leak. The owner/operator is liable for civil penalties under Section 25299(b)(4) for knowing failure to ensure compliance with the law by the operator. These penalty provisions do not apply to a potential buyer.

14. Prior to any drilling activities onto any public right-of-ways, it shall be the applicants responsibilities to contact and coordinate a Underground Service Alert (USA), obtain encroachment permit(s), excavation permit(s) or any other permits required for that City or to the County and follow all City or County Ordinances. It shall also be the applicants responsibilities to provide to the Cities or to Alameda County a Traffic Safety Plan for any lane closures or detours planned. No work shall begin until all the permits and requirements have been approved or obtained.

15. Permit is valid only for the purpose specified herein. No changes in construction procedures, as described on this permit application. Boreholes shall not be converted to monitoring wells, without a permit application process.

PERMITTEE

and subject to the following, PERMISSION IS HEREBY GRANTED to:

Core and drill 3 soils boring locations in the landscape area to test overlaying soil and groundwater contamination for volatile organic compounds (VOC) in accordance to Alameda County Environmental Health Department, on eastbound I-580 off-ramp to MacArthur Blvd., at the 76 gas station, 3535 Pierson Street, on State Highway 04-ALA-580, Post Mile R39.81, in the City of Oakland.

A minimum of one week before the start of work under this permit, a notice must be given to and advance approval of construction detail, operations, public safety, and traffic control must be obtained from State Representative Sunny Mantravadi, 600 Lewelling Blvd., San Leandro, CA 94579, Surya.N.Mantravadi@dot.ca.gov or (510) 614-5951, weekdays between 7:30 AM and 4:00 PM, except holidays.

All permitted work requires the Permittee to apply for and obtain a work authorization number prior to start of work. See the attached "Encroachment Permit Work Scheduling Request Form." Additional time beyond the minimum seven-day advance notice required in this form may be required for obtaining the traffic control approval.

THIS PERMIT IS NOT A PROPERTY RIGHT AND DOES NOT TRANSFER WITH THE PROPERTY TO A NEW OWNER.

The following attachments are also included as part of this permit (Check applicable):

- | | | |
|---|--|---|
| <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No | General Provisions (TR-0045) |
| <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No | Utility & Tree Trimming Provisions (03/2013) |
| <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No | Storm Water Special Provisions (TR-0400) |
| <input type="checkbox"/> Yes | <input type="checkbox"/> No | A Cal-OSHA permit, if required: Permit No. _____ |
| <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No | As-Built Plans Submittal Route Slip for Locally Advertised Projects |
| <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No | Storm Water Pollution Prevention Plan |

In addition to fee, the permittee will be billed actual costs for:

- | | | |
|---|--|------------|
| <input type="checkbox"/> Yes | <input checked="" type="checkbox"/> No | Review |
| <input checked="" type="checkbox"/> Yes | <input type="checkbox"/> No | Inspection |
| <input type="checkbox"/> Yes | ----- | Field Work |

(If any Caltrans effort expended)

- Yes No The information in the environmental documentation has been reviewed and considered prior to approval of this permit.

This permit is void unless the work is completed before May 31, 2016

This permit is to be strictly construed and no other work other than specifically mentioned is hereby authorized.
No project work shall be commenced until all other necessary permits and environmental clearances have been obtained.

ADA Notice For individuals with sensory disabilities, this document is available in alternate formats. For information call (916) 654-6410 or TDD (916) 654-3880 or write Records and Forms Management, 1120 N Street, MS-89, Sacramento, CA 95814.

ADDITIONAL GENERAL SPECIAL PROVISIONS:

All the Permittee's personnel must wear appropriate and approved personal protective equipment per Chapter 12 of Caltrans "Safety Manual" (available at http://www.dot.ca.gov/hq/opo/safety/safetymanual/Chap_12-Sept2012.pdf), including hard hats and bright-colored vests, shirts or jackets with retro-reflective material, while on State right-of-way.

Caltrans is not subscribed to Underground Services Alert (USA). Caltrans may have existing electrical, signal and communication facilities within 9" from the surface. Permittee shall identify all existing underground facilities prior to perform trenching or boring and also repair/replace any damaged Caltrans facility due to their operation.

All utility work must comply with the attached "Encroachment Permits Utility and Tree Trimming Special Provisions" (Rev. 03/2013) (available at <http://www.dot.ca.gov/hq/traffops/developserv/permits/>), which includes "Encroachment Permit General Provisions" (TR-0049, Rev. 05/2007).

All work must comply with the attached "Storm Water Special Provisions for Minimal or No Impact" (TR-0400, Rev. 09/2012) (available at <http://www.dot.ca.gov/hq/traffops/developserv/permits/>), in addition to Water Pollution Control Program (WPCP), if any.

All work must comply with the attached "Encroachment Permit General Provisions" (TR-0049, Rev. 05/2007) (available at <http://www.dot.ca.gov/hq/traffops/developserv/permits/>).

Streets and highways in the San Francisco Bay Area contain a significant number of existing underground utilities. This includes traffic signal conduits that are installed 9 inches or less in depth. Permittee is responsible for necessary site investigations for identification of the location and depth of existing underground facilities prior to excavation (e.g. pothole or hand-dig) to avoid damage or disruption in services.

Certain details of work authorized hereby are shown on Permittee's plan submitted with request for permit, and all work within State Right-of-Way shall conform to current State Standard Plans and Specifications.

All permitted work requires the Permittee to apply for and obtain a work authorization number prior to start of work. See the attached "Encroachment Permit Work Scheduling Procedures" and the attached "Encroachment Permit Work Scheduling Request Form". Additional time beyond the minimum seven-day advance notice required in the above paragraph may be required for obtaining the traffic control approval.

Before any work is begun which will interrupt the normal flow of public traffic, approval shall be obtained from State Representative. No vehicle or equipment shall be stored overnight within the right-of-way; it shall be removed immediately at the completion of the project.

Permittee shall be responsible for the collection and removal of trash or garbage generated by these construction activities.

All debris shall be removed from the right of way and the area left in a safe and presentable condition at the end of each presentable day.

Any damage to existing State's facilities shall be repaired or replaced in kind by the Permittee at Permittee's expense.

Suitable barricades, signs and lights, as approved by State Representative, to warn and protect traffic effectively shall enclose the site of the work.

Permittee shall provide safe pedestrian and bicycle passage around construction area.

Any future relocation of this facility for highway maintenance or construction shall be at the Permittee's expense. Section 703 of the Streets and Highway Code shall not apply.

When operations are conducted, the Permittee must furnish, place, and maintain signs and safety equipment per Part 6, Temporary Traffic Control, of the "California Manual on Uniform Traffic Control Devices" (CA MUTCD), available at <http://www.dot.ca.gov/hq/traffops/signtech/mutcdsupp/pdf/camutcd2012/Part6.pdf>.

When approved, traffic control under this permit must comply with Caltrans Standard Plans RSP T9 through RSP T14 (available at http://www.dot.ca.gov/hq/esc/oe/construction_standards.html). For shoulder closure, see RSP T10. Where required by the plan, the use of flashing arrow board is MANDATORY. Use of flagman is required.

Shoulder and /or parking (if applicable) may be restricted while work is actively in progress.

Shoulder may be closed from 9:00 AM to 3:00 PM, Monday thru Friday. No lane or ramp closure permitted any other time. Holidays Excluded.

Permittee or the Contractor shall verify with City of Oakland for conflict in closure schedule, and cooperate and coordinate with all construction work activities in that vicinity.

If an accident or other incident (related to or not related to the permitted activity) occurs within, or close to the permitted activity, the Permittee shall immediately stop work and remove traffic controls from the highway unless public health, welfare and safety is endangered by unfinished work. Only traffic control to protect open excavations may remain in place. After free traffic flow is restored, work in accordance with the conditions of the permit may be resumed.

Permittee is responsible to remove or cover temporary information or guide road sign if there are no construction activities.

Any change in the existing drainage pattern, whether occasioned by increase or diversion, and the cost of any damage, repair or restoration of the State highway right of way shall be the responsibility of the Permittee.

Changes to the Plans, Specifications, and Permit Provisions are not allowed without Prior approval from the State Representative.

Any damage to existing facilities, landscaping or irrigation within the State Right-of-Way shall be replace in kind by the Permittee at Permittee's expense. Any damaged concrete sidewalk shall be replaced from score-line to score-line and shall be ADA Compliant.

Removal of obstructing vegetation will not be permitted during a declared drought.

Damaged plants shall be replaced in kind by the Permittee at Permittee's expense.

Where there are potential Caltrans electrical facilities (lighting, signal, metering, etc) exist on the project site and not shown on the plans, the Permittee shall be responsible to resolve any conflicts and changes during construction. The Permittee shall incur any additional cost when there are changes to the original plans.

No excavation or trenching necessary or permitted.

Permittee shall be responsible to provide temporary concrete washout area, and see the Standard Plan 2010, Detail TS9.

The "Concrete Waste Management", following link: <http://www.dot.ca.gov/hq/construc/stormwater/WM-08updated.pdf>.

Residue from saw cutting, coring and grinding operation shall be picked up by vacuum device. Residue shall not be allowed to flow across the pavement and shall not be left on the surface of the pavement.

Vacuumed slurry residue shall be disposed in accordance with, "Solid Waste Management" and "Storm Water Special Provisions for Minimal or No Impact."

Permittee shall remove and dispose of all spoils outside of State Right-of-Way. Permittee shall provide records of all the sites of disposal facilities to State Representative.

All boring operations must be done by a dry bore method without the use of air, water, or other liquid material, except that a minimum quantity of water supplied from a container mounted on operator's equipment may be used for bit lubrication, if authorized by the State Representative.

The permittee must ensure that all drilling fluids and earthly material are disposed in a way acceptable to the appropriate local, state, or federal regulatory agencies. Excess drilling material must be tested for contamination and disposed per local, state, and federal requirements.

Permittee reserves the right to impose any additional requirements or conditions, including considerations, for the use of its right of way, if such requirements or conditions are allowed by future legislation, administrative determination, and/or court decisions.

In case of conflict, permit requirement shall govern over existing Plans, Specifications & Estimates.

This Encroachment Permit herewith, for the work authorized to Chevron Environmental Management Company. Other Contractors shall apply for separate permit.

In addition to the above conditions, Permittee understand and acknowledges that the conditions, limitations, restrictions and reservation for access to state-owned highway right of way for telecommunications and information technologies, including consideration and means of access, are subject to current and ongoing Department and/or legislative review, and this permit may be revoked, made subject to different conditions, limitations, restrictions and reservations, or converted to license, lease or other form of agreement, upon reasonable notice.

Permittee understands and agrees that it will comply with the obligations of Titles II and III of the Americans with Disabilities Act of 1990 in the conduct of the event, and further agrees to indemnify and save harmless the State of California, all officers and employees thereof, including but not limited to the Director of Transportation, from any claims or liability arising out of or by virtue of said act.

A copy of this permit, complete with all attachments, shall be kept by the Permittee/contractor working under this permit and must be shown to the State Representatives, or State California Highway Patrol.

Notwithstanding General Provision No. 4, the Contractor for the Permittee must apply for a separate encroachment permit ("Double Permit" or "DP") for the work authorized therein, and the application must be accompanied by a check of the amount equivalent to \$492.00 is required at the time of application together with a copy of liability insurance, list State as insured. Additional inspection cost at the current Caltrans standard hourly rate of \$82.00 per hour. Permit processing fee per the current State hourly rate (available at <http://www.dot.ca.gov/hq/traffops/developserv/permits/>).

Permittee shall be responsible for full compliance with the Caltrans Storm Water Program and the Caltrans NPDES permit requirements. Please see the Storm Water Special Provisions attached to this Permit.

Any work involving bona-fide emergency repair on Permittee's facilities shall be initiated with Caltrans District 4 Communications center at (510) 286-6359 to obtain an appropriate lane closure or work authorization number. Emergencies are defined as those conditions that require immediate action to prevent property damage, loss of service, or life-safety risks.

Permittee shall refer to State's 2010 Standard Specifications and 2010 Standard Plans.

Permittee shall be responsible for any liability issue due to the proposed improvements within State Right-of-Way.

Permittee shall make an effort in controlling construction noise pollution within the local City ordinance.

California Endangered Species Act must be adhered to the law, regulations and policies in the provisions, <http://www.dfg.ca.gov/habcon/cesa/>.

Migratory Bird Treaty Act must be adhered to the law, regulations and policies in the provisions, <http://www.fws.gov/migratorybirds/RegulationsandPolicies.html>; no work shall be allowed during bird nesting and the nesting area must not be disturbed and shall be protected.

Changes to the Plans, Specifications, and Permit Provisions are not allowed without prior approval from the State Representative.

Immediately following completion of the work permitted herein, the Permittee shall fill out and mail the Notice of Completion attached to this permit.

Notes And Definitions

MDL	Method Detection Limit
ND	Analyte Not Detected
PQL	Practical Quantitation Limit
A01	Detection and quantitation limits are raised due to sample dilution.
A10	Detection and quantitation limits were raised due to matrix interference.
A17	Surrogate not reportable due to sample dilution.
A52	Chromatogram not typical of diesel.
L01	The Laboratory Control Sample Water (LCSW) recovery is not within laboratory established control limits.
Q02	Matrix spike precision is not within the control limits.
S09	The surrogate recovery on the sample for this compound was not within the control limits.
