**SUBJECT: IMPLEMENTATION OF PROPOSED INTERIM
 GROUNDWATER REMEDIATION WORK
 PLAN FOR THE PROPERTY
 LOCATED AT 400 SAN PABLO AVENUE, IN
 ALBANY, CALIFORNIA**

Dear Ms. Shin:

In response to our recent phone conversation regarding schedule to implement our proposed interim groundwater remediation for the property located at 400 San Pablo Avenue, in California.

After brief discussion with Mr. Murray Stevens, we agreed with the following schedule:

Off-site monitoring well installation per our proposed work plan dated May 4, 1993, Figure 3 1st week of August

Wells development and sampling of on-site and off-site wells 2nd week of August

File No. 8-90-421-SI

Technical report	1st week of September
Prepare risk assessment	3rd week of September
Second quarterly monitoring and sampling of on-site and off-site wells	3rd week of October
Quarterly monitoring and sampling report and modification of treatment system, if necessary	2nd week of November
Apply for all necessary permits for construction of treatment system	4th week of November
Construction of treatment system	2nd week of December
Evaluation of the system 6 months after operation of remedial system	June of 1997

If you have any questions or require additional information, please feel free to contact our office at (408) 441-1881.

Sincerely,

SOIL TECH ENGINEERING, INC.
