David,

I will look provide a written response within the next two days. I was expecting this report to be processed through the ftp site. Since it was not uploaded until recently, it did not get into my report tracking.

Regards,

Jerry Wickham

Jerry,

I was hoping to get a written response to the attached report that I sent to you in late November. We are asking the ACHCSA to agree, in writing, to continuing to operate the ozone-sparging system through 2009. Your approval letter will be used in the budget package that the USTCF is requiring for this site. The budgets are due Feb 1, 2009, so I am hoping you can respond to this email as soon as your schedule will allow you. Regards.

Subject: RO0262 9-Month Remediation Effectiveness Report

Dear Mr. Wickham,

Please see the attached report that details the Albany Hill Mini Mart's remediation system's performance over the last 9 months. We are looking for a letter from your agency that directs our client to continue the system's operation until groundwater concentrations meet ESLs. We have recommended operation of the system through at least December 2009. A written response is necessary to receive reimbursement of O&M costs from the USTCF. A copy of this report will be uploaded to Geotracker and to the County Server (if possible). I say if possible in regard to the County Server because we have not been able to upload docs to your server for quite some time. We work on Apple computers, and our web browser is not supported by your server. We have spoken to several people at your agency, but so far a solution hasn't been identified. Regards.
