Subject: Station #3 (164th Ave.) underground tanks

Paresh,

It is my understanding that you are requesting a document to be submitted to your office by December 1st for the accidental release of a toxic substance. Robert Weston is sending me the document which I will fill out tomorrow. I will need to have this document signed by the Deputy Chief in charge of Support Services next week. As a result, it will not be to you by the specified date but shortly after that date.

From our conversations last week, it was brought to our attention that there were traces of contaminants in the soil that need further investigation. I am currently working on the necessary paperwork for the testing of the soil. The process of contacting multiple contractors to conduct this investigation may take a few weeks but I will keep you informed of the status.

If you have any questions please contact me at (510) 693-3438.

Bob S
