Bob,

The proposed report submittal date of August 31, 2011 is acceptable in order to include the off-site soil vapor data.

Subject: Fieldwork and Report for 1432 Harrison Street, Oakland

Jerry:

I had sent you an email several weeks ago advising you of the scheduled dates of May 30-June 2 to conduct the fieldwork along Harrison Street, associated with the ACEH site located at 1432 Harrison. We have completed the fieldwork and have a set of soil and grab-groundwater samples at the lab being analyzed. We expect to receive the lab results sometime next week. In my email of May 26, I stated that we hoped to provide a report to you by the end of June or early July. That does not appear possible as we would have only 2 or 2.5 weeks to generate the report. Also stated in the May 26 email was that installation of basement vapor probes could not be accomplished because of access issues. At the present time, the access agreement is being rewritten and should be presented to the property owners of 1445 Harrison soon.

We would like to include vapor data in the report so, assuming access is granted to install and sample the probes, I would like to propose a submittal date of August 31 for the report documenting results, conclusions and recommendation for the complete scope of work.

Please let me know if this is acceptable either by email or in a phone call. If I do not hear back from you by later this week, I will call you to discuss this proposal.
Thanks for your understanding and consideration.
