

4/27

① Spoke to Phil Briggs (Cowan)
to arrange on-site meeting
to strategize off-site
investigation May 3
@ 10:00 AM

② Well/GW issues
- low GW elevation
- confined GW streams

5/3

Exp. meeting. Decided to get
a couple more qtr. of data
from wells before deciding how
to proceed. Off-site wells
would be problematic in the
residential neighborhood next
door.

Also, informed P. Briggs of
lab results for 2/99 event.
Concentrations appear strange.
He will look into it.

SPS

Contact Log

- 7/18/96 Left message for Jean Castro - wanted to know status of tank removal & requested additional info for tank removal plans.
- 7/23/96 Will select contractor & submit info w/in next 30 days. (Jean Castro).
