DOCUMENT DESCRIPTION: Site Plan showing proposed well locations (MW-4 through MW-6) at Chevron Service Station #9-3322 located at 7225 Bancroft Avenue in Oakland. Well installation has been scheduled for November 30, 1998.

MESSAGE:

There is a telephone booth, Chevron sign and a large tree in the area of proposed well MW-4. Therefore, well MW-4 needs to be moved approximately 7 feet to the southeast. The planter near proposed MW-5 location is only 1.5 feet wide with many shrubs and a sprinkler line along the planter and is bordered with a fence to the northwest. Therefore, proposed well MW-5 needs to be moved approximately 4 feet southeast. The planter in the western corner of the site (in the area of proposed well MW-6) is fenced off. There is a large tree on this planter and a restroom building next to the planter. Sewer and telephone lines are adjacent to the planter. It appears, that well MW-6 could be installed onsite in one of the locations shown with question marks on the attached Site Plan. However, these locations are only approximately 25 feet away of well MW-3, therefore, a well installed in one of these locations would provide redundant data and does not appear to be necessary.
