Scott,

Your suggestion to postpone the next monitoring event to the fourth quarter if needed seems reasonable. I concur with postponing the semi-annual groundwater monitoring event.

Jerry:

We are in the process of finalizing the work plan & Low Threat Closure Policy evaluation that you requested for this site.

One question:

While this site is being evaluated for potential closure, do we still need to complete a semi-annual groundwater monitoring and sampling event? Right now, the project is on a first/third calendar quarter schedule, and we had tentatively planned to sample it in mid August. Please let me know if this is still required, or if it can be postponed. My suggestion would be to postpone it, and then if we don't get closure, switch the site to a second/fourth calendar quarter schedule.

Please let me know what your thoughts are on this.

Scott Bittinger
