Just got off the phone with Paul King, consultant for the subject fuel leak case. Mr. King was responding to an email I sent out earlier today regarding file uploads to Geotracker. Mr. King indicated several of the reports predated the EDF requirement so are not available. I told him that did not expect pre-Geotracker data to be uploaded, including DTW water data. He will have Mr. Steve Carmack go through the case file to determine what needs to be uploaded and determine if the data is available. He'll upload what he can. I thanked him for the prompt response.

Mr. King let me know that the best way to contact Steve Carmack is through Paul King, and indicated the RP may authorize the release of a pending work plan.
