Subject: Chevron 90121 (RO284) Extension Approval

Alexis,

Based on the meeting of April 24, 2014, ACEH is in agreement that the data gap work plan and SCM previously requested to be submitted by July 3, 2014, should incorporate data and recommendations based on a second round of vapor sampling at the subject site and associated downgradient structures. ACEH has extended the submittal date to August 29, 2014. Existing protocols will be employed, and will incorporate relevant sampling protocol comments (helium concentrations) contained in the April 4, 2014 directive letter.
