Re: **Chevron Service Station #9-0121**  
**3026 Lakeshore Avenue**  
**Oakland, California**

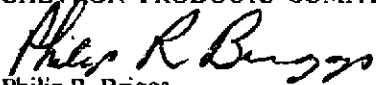

Dear Ms. Eberle:

Enclosed is the First Quarter groundwater monitoring report for 1996, dated February 28, 1996 and prepared by our consultant Blaine Tech Services, Inc. for the above noted facility. As noted on the report, ground water samples were analyzed for total petroleum hydrocarbons as gasoline (TPH-G), total petroleum hydrocarbons as diesel (TPH-D), BTEX, and MTBE.

Benzene was detected in monitor wells MW-1, MW-3, and MW-4 in concentrations of 280, 510, 230 ppb respectively. This is a decrease in all wells from the last quarterly report. MTBE was detected in wells MW-1, MW-4, but none in MW-5 as in the last quarterly report. Separate phase hydrocarbons were detected in MW-2 with a measured thickness of 0.38 feet. This is a decrease from the last report. Approximately 0.008 gallons of separate phase hydrocarbons were removed by hand bailing. Note that Blaine Tech Services has amended the volume measurements to show the volume removed to one one-thousandth of a gallon. This was done to more accurately report the small amounts removed. Blaine Tech has changed the volume measurements of the previous quarterly reports, and these changes are reflected on this report. Copy of Blaine Tech letter noting these changes is enclosed.

Chevron will continue to monitor and samples all wells on a quarterly basis and review the results to determine why MTBE has recently shown up in two to three of the wells. We will continue to send SIR reports to your office as requested. We will also continue to remove separate phase hydrocarbons from MW-2 on a quarterly basis, when present. Chevron will evaluate any new data collected to determine if additional actions are warranted. If you have any questions, please call me at (510) 842-9136.

Sincerely,  
CHEVRON PRODUCTS COMPANY

  
Philip R. Briggs  
Site Assessment and Remediation Project Manager

Re: Amendment To Report Table Concerning Separate-Phase Removal Column For Chevron  
9-0121

Dear Mr. Briggs,

The values reported for this and past events concerning Separate Phase Hydrocarbon (SPH) Removal have been amended so that the volume removed is shown to one one-thousandth of a gallon. All future data will be reported similarly.

Sincerely,

A handwritten signature in black ink, appearing to read "Francis Thie". The signature is fluid and cursive.

## 1st Quarter 1996 Monitoring at 9-0121

First Quarter 1996 Groundwater Monitoring at  
Chevron Service Station Number 9-0121  
3026 Lakeshore Avenue  
Oakland, CA

Monitoring Performed on February 28, 1996

### Groundwater Sampling Report 960228-K-2

This report covers the routine quarterly monitoring of groundwater wells at this Chevron facility. Blaine Tech Services, Inc.'s work at the site includes inspection, gauging, evacuation, purgewater containment, sample collection and sample handling in accordance with standard procedures that conform to Regional Water Quality Control Board requirements.

Routine field data collection includes depth to water, total well depth, thickness of any separate immiscible layer, water column volume, calculated volume of a three-case volume purge, elapsed evacuation time, total volume of water removed, and standard water parameter instrument readings. Sample material is collected, contained, stored, and transported to the laboratory in conformance with EPA standards. Purgewater is, likewise, collected and transported to Chevron's Richmond Refinery for disposal.

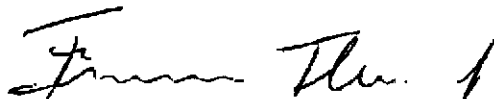

Basic field information is presented alongside analytical values excerpted from the laboratory report in the cumulative table of **WELL DATA AND ANALYTICAL RESULTS**. The full analytical report for the most recent samples is located in the **Analytical Appendix**. The table also contains new groundwater elevation calculations taken from the computer plotted gradient map which is located in the **Professional Engineering Appendix**.

At a minimum, Blaine Tech Services, Inc. field personnel are certified upon completion of a forty-hour Hazardous Materials and Emergency Response training course per 29 CFR 1910.120. Field personnel are also enrolled in annual eight hour refresher courses.

Blaine Tech Services, Inc. conducts sampling and documentation assignments of this type as an independent third party. In order to avoid compromising the objectivity necessary for the proper and disinterested performance of this work, Blaine Tech Services, Inc. concentrates on objective data collection and does not participate in the interpretation of analytical results, the definition of geological or hydrological conditions, the formulation of recommendations, or the marketing of remedial systems.

Please call if you have any questions.

Yours truly,

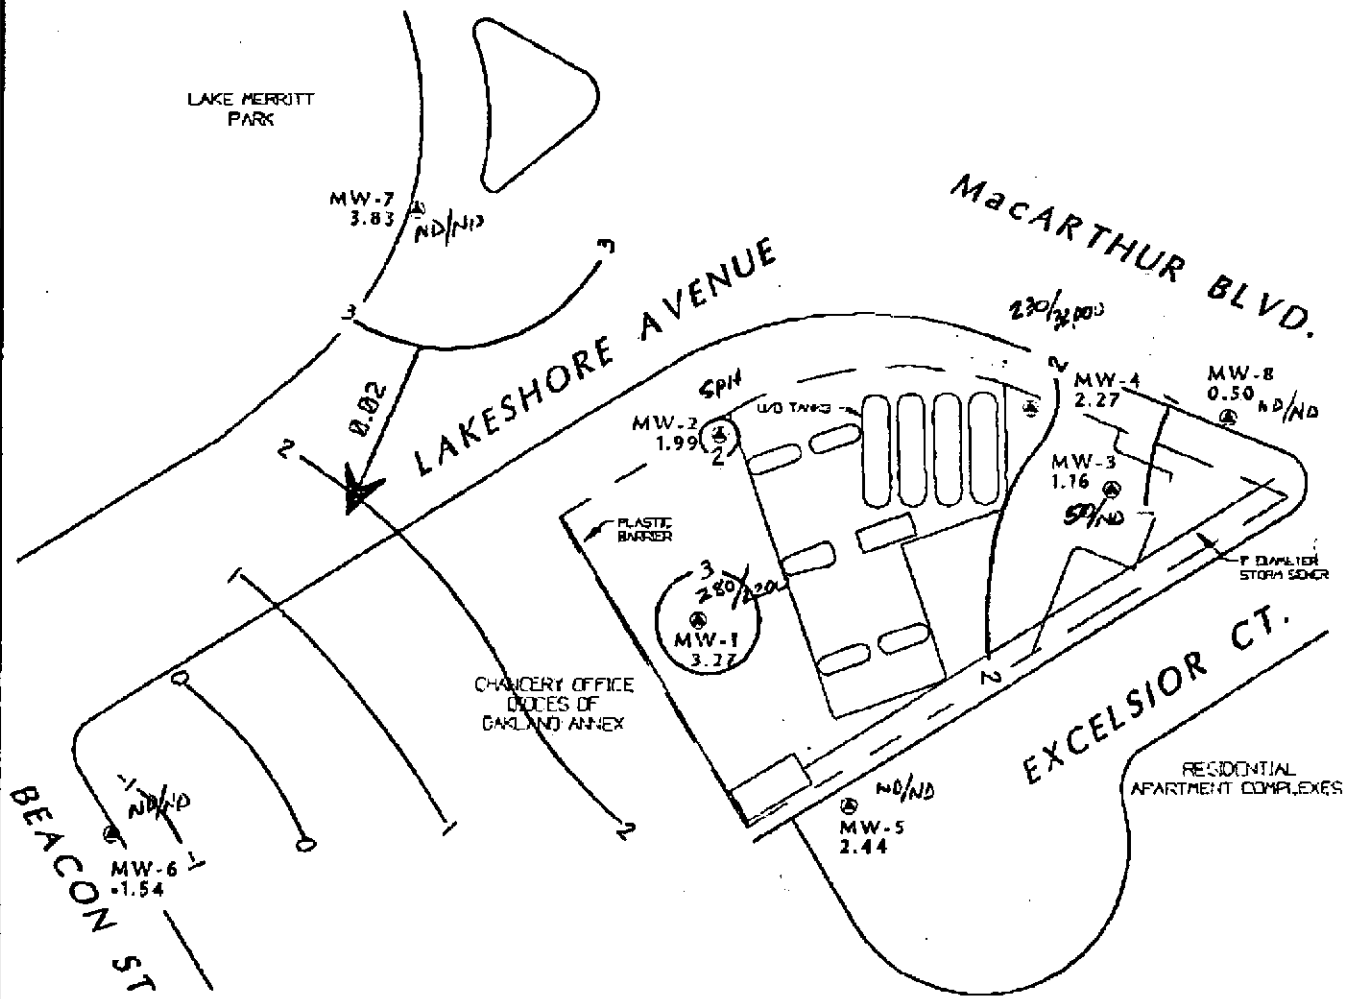

James Keller  
Vice President
