Returned a phone call from Nissan Sadian, owner of the adjacent site (3008 Lakeshore Ave). He is very concerned about Chevron's contamination coming up from the ground as he and his kids sleep in the building. I let him know that while I have not seen the recent data, the previous data indicated that outdoor air and indoor air are very similar and the problem so far appears to be associated with outdoor air and associated contamination and not contamination from a the ground. We agree to talk once the data is available.
