Olivia,

Here are some dates in November for meeting:

Tuesday, November 13 10:00 am or 2:00 pm
Wednesday, November 14, 10:00 am
Tuesday, November 27, 10:00 am or 2:00 pm

There is no additional guidance from ACEH regarding the low-threat closure policy. Within the next 4 weeks, a list of required items for LTCP consideration will be posted on the ACEH website. This will describe the type of data that will be required to support a request for LTCP closure.

Regards,
Jerry Wickham
Alameda County Environmental Health

Jerry-

Clearwater respectfully requests a rescheduling of the August 22 meeting which we all had previously organized for meeting to discuss the above site case.

A combination of the loss of Clearwater's project manager, Erik Lervaag, the closing of Wright Environmental (a vendor we had intended to use on this job) subsequent to the sudden loss of the owner and the unforeseen provision by the USTCF to several of Clearwater's other USTCF sites of large change order approvals right at the end of the USTCF fiscal year (second and third week of June) have all served to set our schedules back by about three months.

The installation of the Low Threat Policy this past week has also caused some changes which need to be worked through. On that issue, please could you copy us on global directives which the ACEH is planning to issue in response to agency changes. It would help us in the planning of this project, if we had these in hand, timely, before we meet.

In summary, please could you offer a meeting about 90 days from now; also, please would you advise in regards to changes in ACEH closure thresholds which we will need to be working with.

Many thanks.

Olivia
