Hi Gale,

The work plan is contained in the soil and groundwater investigation report of that date (March 15, 1999). A PDF copy is on our website under the case number; however, I've attached a copy with this email. Regardless, it would probably be worth your time to see what documents are available on the website. See the link below my name, and follow the links; use the search tab at the top of the blue column on the right side of the page after allowing popups, there will be a few drop downs, but ultimately use the short version of the RO number (297) and you should be able to see what is posted for the site. It may just be your wording, but I did want to caution you not to get the soil samples until after we've had a chance to review the plan for work so that we all agree that the scope of work is good (if you're getting an estimate for the work, perfect). But, thanks for claiming the site.

Mark

I have complied with the requirement to claim site with Geo Tracker. I am working on the requirement to update and revise Work Plan and submit "Electronic Submittal of Reports". I am in the process of getting soil samples to analyze for TPHd and investigate extent of MTBE contamination as requested in the notice of violation attached. The violation refers to a 1999 work plan submitted by the City of Albany. Is there a way I could receive a copy of this work plan to use as reference?

**Subject:** Notice of Violation Compliance

Mark

My name is Gale Rossi and I work with Public Works for the City of Albany. I was just given the attached notice of violation RO0000297 and GeoTracker Global ID T 06000102152 for the City of Albany. I am to work to get this violation corrected. Looks like Geo Tracker Compliance required to claim site due by July 27, 2012 and Update and revise Work Plan by August 31, 2012. I am clueless to these requirements but will get on it. The site must be claimed which will be my first task. If you can help with advice on how this is done or direction where I can go to learn to do this would be appreciated.

Thank you

Gale Rossi
