Subject: German Auto Access Agreements

Good Afternoon Mark,

I wanted to give you a status update regarding additional work at German Auto—We hadn't received a signed access agreement for the offsite soil borings at which point I had informed you we were having trouble. After we exhausted efforts to contact the offsite property owner, we had sent additional access agreements to other property owners adjacent to German Auto, also with no luck.

Today, September 3rd, we finally received the signed access agreement we had sent in May to the adjacent property owner. We will proceed with scheduling and implementing the scope of work approved in the April 28th letter from Alameda County.

If you have any questions or comments, feel free to contact me.

Best regards,

Trevor Hartwell, P.G.
