Department of Environmental Health
1131 Harbor Bay Parkway
Alameda, CA 94502-6577

Dear Mr. Seery:

We received your phone call concerning an updated SWI map for German Autocraft.

Enclosed is the updated map. ~~In light of the new gradient data, we have included several additional points, and other less important proposed sampling locations may be eliminated as the investigation is in progress.~~

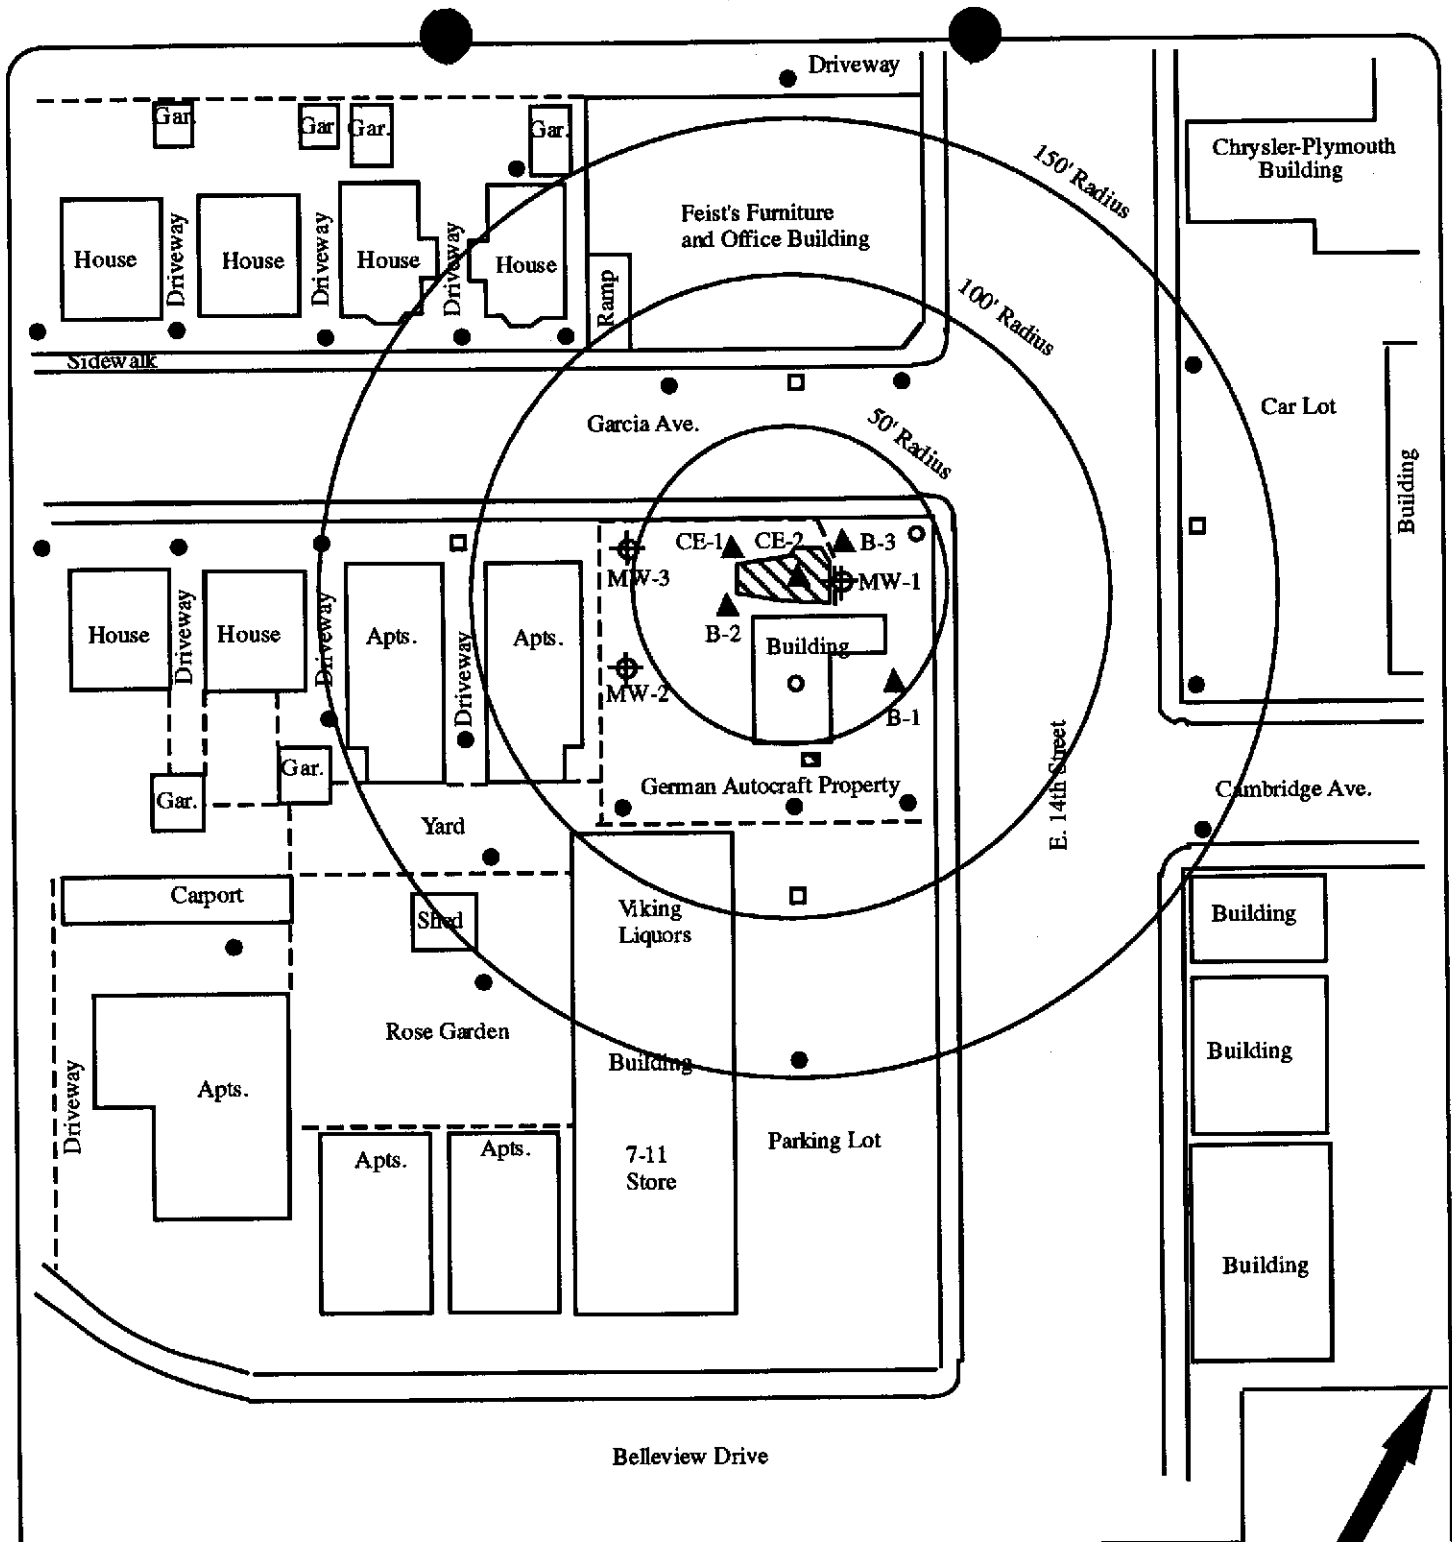

In reference to the sampling point located in the rose garden, Mr. Jensen issued the following rather blunt response: "We are not interested in participating." and returned the packet we sent him and has failed to return our subsequent call. Please call him at (510) 352-6689 and encourage him to cooperate with us.

We will be out of town for two weeks however, we will continue making reminder phone calls to several parties who have still not issued authorization.

Sincerely yours,

Tom Price
Project Manager
