Date: Friday, May 24, 2013 1:26:00 PM

Hi Bob:

Thank-you for the recently submitted report entitled *Corrective Action Plan Addendum*, dated March 18, 2013, and prepared by Pangea Environmental Services, Inc. (Pangea) on behalf of Mr. Hooshang Hadjian for the subject site. The CAP Addendum recommends conducting additional secondary source removal using enhanced biosparging utilizing existing wells and underground remediation piping.

Alameda County Environmental Health (ACEH) staff have evaluated the data and recommendations presented in the above-mentioned report, in conjunction with the case files, and the State Water Resources Control Board's (SWRCBs) Low Threat Underground Storage Tank Case Closure Policy (LTCP). As discussed on the phone today, prior to approving additional work at the site, ACEH would like to schedule a meeting with you to discuss the Site Conceptual Model with respect to site hydrogeology and contaminant transport. Specifically, we would like to discuss the complex groundwater flow at the site due to the combined effects of vertical gradients, the nearby creek/flood control channel, seasonal fluctuations in flow direction, possible influences of the city sewer line located beneath Dublin Boulevard and the on-site car wash and irrigation practices, and the adequacy of the existing monitoring well network and the interpretation of data.

Prior to our meeting on May 28, 2013 at 11:00 am at our offices in Alameda, please have Mr. Hadjian send me an authorization to proceed as I do not have an email address for him. I look forward to talking to you about the site.

Thank-you,

Dilan Roe, P.E.
