**Addendum to Workplan for Soil and Groundwater Investigation
Salle's Paint & Body Shop
1049 9th Avenue
Oakland, CA 94606**

Dear Mr. Huang:

This Addendum to the April 14, 2000 Workplan for Salle's Paint & Body Shop (Figure 1) is to confirm the new location of Monitoring Well MW-1. As you requested in our phone conversations of May 17 and 19, the well will be located in the sidewalk approximately 10 to 15 feet southwest of the former waste-oil tank location (Figure 2).

The precise location may have to be adjusted in the field depending on the presence of underground utilities and such.

Three soil samples from the MW-1 boring will be submitted for laboratory analysis. The approximate depths will be 5-ft, 10-ft and 15-ft below ground surface. The analytical methods are listed in Task 6 of the April 14 Workplan.

We have scheduled site work for July 14, 2000, pending approval of this Workplan by the ACHCSA. The report will be submitted within 30 days after receipt of the analytical results.

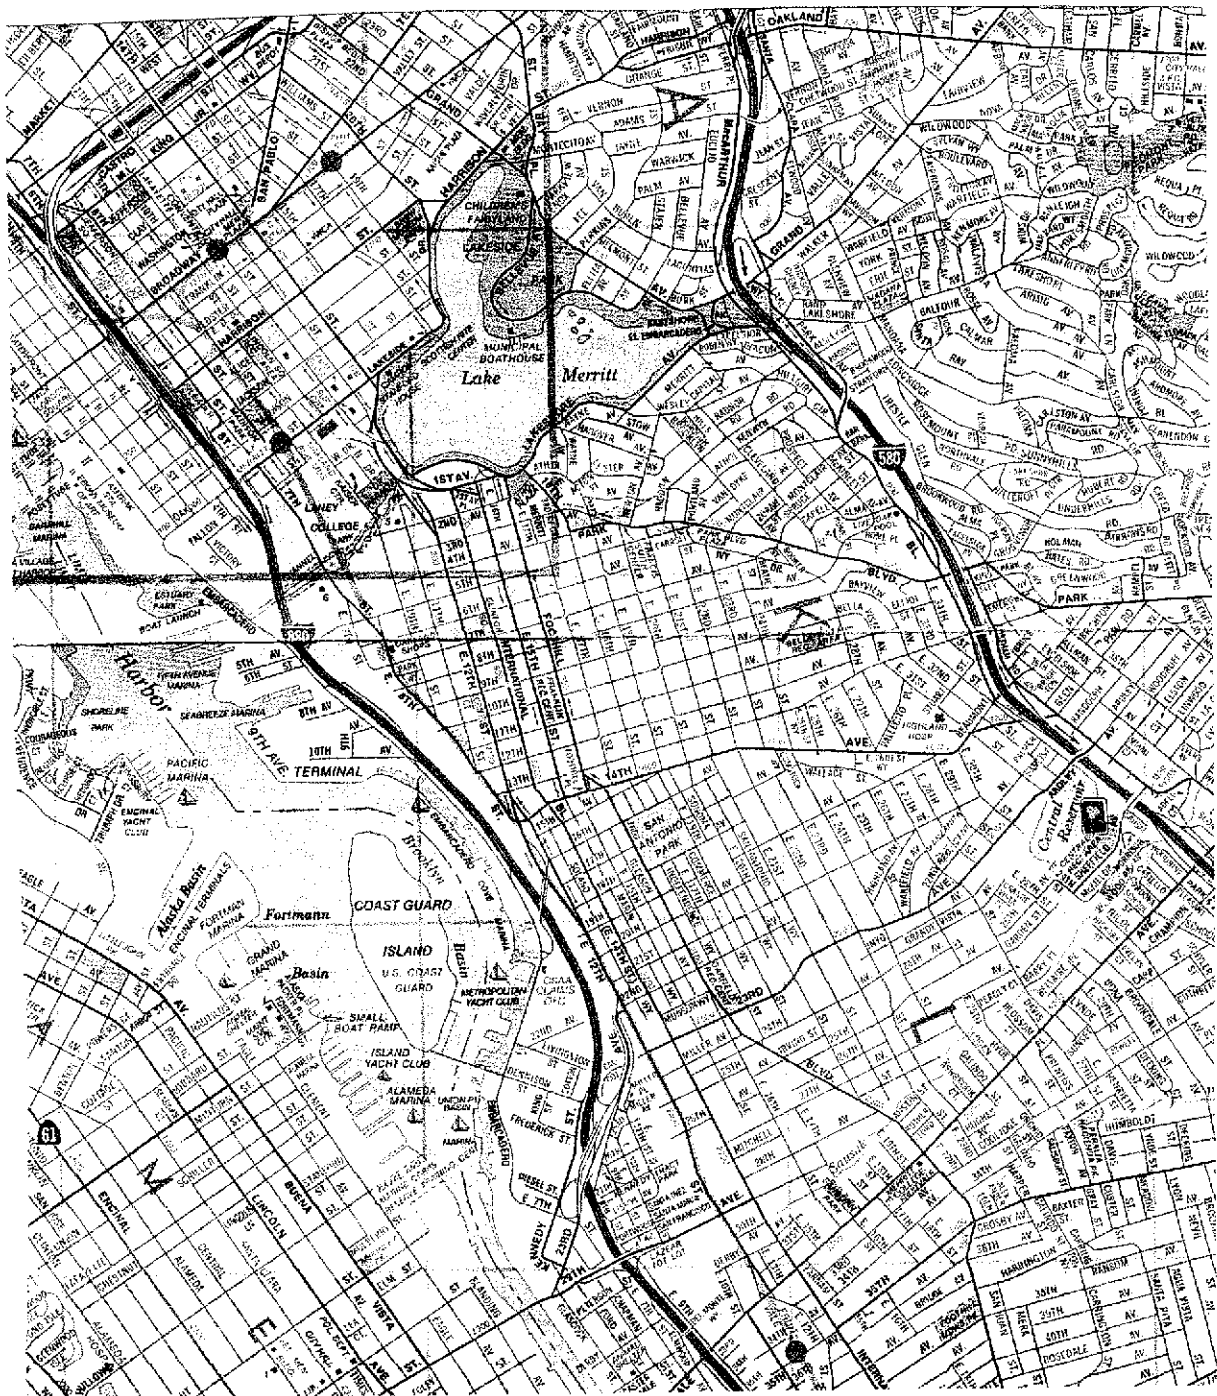

Sincerely,

Richard W. Ely
