

## CONTACT LOG (15701 Lorenzo Ave, San Lorenzo)

- 03/02/99 Karen Langmaid, (510) 317-4600 #4834, called to say that there's been a delay in the workplan submitted because they haven't been able to confirm the location of the former small gas UST. Ms. Langmaid spoke to a former employee over the phone who has suggested that the gas UST was in a courtyard. She will take phased approach & begin investigations for the former diesel UST. A workplan will be submitted by the end of March '99. If there are delays, I requested that Ms. Langmaid call me.
- 03/15/99 Karen Langmaid called to say that they are still having difficulty locating the area of the smaller gas tank. She attempted to coordinate a meeting w/ her consultant and me to discuss situation, but to no success. I told her I would be out of the office until April 1 '99.
- 04/05/99 Called Karen Langmaid, (510) 317-4600 #4834, and left message requesting that she return my call to discuss submitted workplan.
- 04/06/99 spoke to John Mirakofsky, consultant, about his contacts for the smaller tank area.
- 04/14/99 John Mirakofsky, consultant, called & requested that I fax him portion of the May '93 B.W. Report. He is working on the map he thinks has identified the location of the former gas UST. The workplan should be completed by end of April '99.

RE: 15701 Lorenzo Ave, S.L.

---

I told Mr. Chan that the well screens for MW-1 thru MW-3 at the site are screening too far below the water table, so that the results of ND from these wells are not accurate. However, MW-4, the newest well, appears to be screening adequately above and below the water table and appears to be located downgradient of the former tanks. Therefore, I stated that they must continue monitoring of MW-4 for at least two more quarters. Although some contaminated soil appears to still be at site, contaminants in g.w. from MW-4 is very low and silty & clayey soils out at site. →

Mr. Chan requested that I fax  
him letter & cc: George Wilson at  
LW.
