**Subject:** RE: RO231,Harrison Street; RO484 706 Harrison & RO321 706 Harrison

Thanks Donna. When we talked, I should have mentioned that the new COP site manager is Shelby Lathrop; I will pass on to her.

Hi Donna,

Thanks for your call today regarding the proposed changes in analyses for the Harrison Street sites. Based on your concurrence, during the third quarter 2010 monitoring event we will begin analyzing for metals and SVOCs in wells nearest the areas of the former waste oil tanks and clarifier: MW-1 at 800 Harrison, MW-2 at 726 Harrison, and MW-3 at 706 Harrison. We will also discontinue analysis for ethanol at 800 Harrison.

Hello Donna,

We have not heard if there is a new case worker for the sites at 706, 726, and 800 Harrison Street, or if we should continue to contact you regarding these sites. In our third quarter 2009 monitoring and sampling report for these sites, we had recommended groundwater analyses for metals and SVOCs in several wells, and that analysis for ethanol at 800 Harrison be discontinued. We did not receive regulatory concurrence and these recommendations are again included in the first quarter 2010 report, which we are getting ready to submit. In the interest of moving the sites forward, we will implement these recommendations for the third quarter 2010 unless we hear back from you or a new case worker. ConocoPhillips also continues to work with representatives of the adjoining properties to enter into a commingled plume agreement.

Thanks,

Diane

Hello Donna,

I am contacting you because Steven Plunkett informed me that he is no longer the case worker for the sites at 706, 726, and 800 Harrison Street in Oakland. On behalf of ConocoPhillips, we have been working with the other responsible parties to enter into a commingled plume agreement. At this time, the management of the case at 800 Harrison Street is in the process of being transferred from ConocoPhillips to Chevron. We will keep working with Chevron and the other RPs to finalize the commingled plume agreement, and continue to provide coordinated groundwater monitoring reports with Stantec as the lead consultant. If you have any questions, please feel free to contact me.

Hello Diane,

Thank you for the update and the resolve in moving this case forward. However, in response to your email regarding status of the site I have transferred to the CUPA program, and as such I am no longer the case worker responsible for oversight of LUFT/SLIC cases. Please contact the LOP program manager (Donna Drogos) to discuss any program issues related to this site.

Best Regards,

Hello Steven,

I wanted to send you an update on the Harrison Street sites. COP's attorneys have been working with Mr. Gin's attorney, and there is a draft financial agreement on the table. The coordinated first quarter 2010 monitoring and sampling was performed on January 25, and we will submit the first quarter report by April 15. Hopefully, by then we will have this last piece ironed out, have submitted the complete commingled plume application, and be able to discuss or meet regarding the coordinated path forward.
