RO333 - 6450 dublin ct

07/11/05, 937a, jim gribi, dublin toyota, initial results submitted for soil boring portion, 3 MW, want to install another 10 MW, 4 shallow & 6 deeper, wells schedule for next week. Go ahead with that, originally proposed only 4 wells. MTBE 30', can we go ahead & install
707-748-7743

07/25/05, 240p, submitted a report a month ago, well pairs,
Interim remediation, aggressive fluid vapor recovery, vaccum truck

Discussed installation of well pairs. Is vertical depth defined? No, uncertain. Appeared limited in source area however plume moved laterally & deeper? We need to reiview. Will see about assigning a CW. Okay he will wait for county to review.

left detailed v-mail message:

site is currently out of compliance

we require that they 1) submit workplan addendum, 2) perform and report quarterly monitoring and 3) make geotracker uploads

emphasized that their compliance is critical, and that they are currently out of compliance

requested that an extension request be made within the next couple days or week

left my phone number should he have questions

Called Jim to request status:

1. SWI & CAP workplan addendum requested in Aug 11, 2003 letter (due Sept 11, 2003) has not yet been prepared.
2. QM has been performed but not reported
3. no geotracker uploads

I requested that Jim inform his client of need to stay in compliance with requests. I will also contact the RP.
