Re: **Addendum to
Investigation/Well Destruction Workplan**
Chevron Service Station 9-6607
2340 Otis Drive
Alameda, California

Dear Mr. Chan:

Based on our conversation of this morning and on behalf of Chevron Environmental Management Company (ChevronTexaco), Cambria Environmental Technology, Inc. (Cambria), is submitting this addendum to the Investigation/Well Destruction Workplan for the site referenced above (Figure 1). To address your concerns regarding placement of investigation borings, Cambria proposes adding two additional borings in the locations we discussed. These additional borings are illustrated on the attached Figure 2.

We believe these borings will provide pertinent data to complete investigation of this site and, hopefully, lead to a more rapid case closure. Please contact Robert Foss at (510) 420-3348 with any additional questions or comments you may have regarding the site or this workplan addendum.

Sincerely,

Cambria Environmental Technology, Inc.

Robert Foss, R.G.
Associate Geologist
