Hi David,

All documents we have can be accessed on-line through the link below my name. Choose the LOP Records link in the top center, then select the search tab at the top of the right hand blue column, allow pop ups, then choose LOP document search, and then use the short hand case number (399) in the Record ID - RO Number field. That will get a few sites you can choose from (don't use the map, it's serious slow). There's not much (any that I'm aware of) that are post-2001, the Geotracker upload requirement (the exception being bore/well logs). If however, there are pre-2001 documents ACEH does request/require all documents be uploaded to the ACEH ftp site, as the ACEH website is far more comprehensive. Perjury statements aren't required for pre 2002 (I think, I'm fuzzy on the exact cut off) documents as historical. Hope this helps!

Mr. Detterman,

Aqua Science Engineers (ASE) has been retained by Mr. Thomas Curran to handle his environmental requirements at the subject site. ASE would like to know if you have any of the historical reports at your agency for review, since Geotracker does not seem to show any. Mr. Curran is currently attempting to locate any historical documents, but has been unable to up to this point in time. In order to get into compliance per your request, we ask for your assistance is supplying us with any historical reports so that we can (a) submit them to Geotracker, and (b) determine what next steps are necessary to push this site toward an NFA letter.

I look forward to your response. Regards.

David Allen
