Hello Tom, David,

I appreciate the update and your efforts. Please use this email as documentation of acceptance of your request for extension. In regards to the Geotracker Compliance and Information requests, I suggest we observe an October 14th deadline, and in regards to a work plan, I'll suggest a November 18th deadline. I would suspect that should be enough time to accomplish those tasks, but do let me know if you encounter difficulties. I'll update Geotracker shortly to reflect the changes.
Best,

Mark Detterman

Mr. Detterman,

Aqua Science Engineers (ASE) has been retained by Mr. Tom Curran to deal with the environmental requirements at his 4377 Adeline Street site in Emeryville, CA. ASE is currently working on fulfilling the request made by your agency in your July 22, 2011 letter to Mr. Curran. We have obtained permission from Geotracker to upload reports and data to Geotracker, but have not yet done so as we are in the process of gathering the data prior to uploading. I have visited the site with Mr. Curran, and am currently determining the next course of action for the site which will be detailed in workplan as soon as possible. ASE respectfully requests additional time to fulfill your agency's request for information. Please be assured, ASE and Mr. Curran are very interested in completing all of the necessary tasks to gain case closure for this site as soon as possible. I look forward to your response and the opportunity to working with you on this project. Regards.

David Allen
