Subject: Meeting for 3135 Gibbons / Former Chevron (RO341)

Mr. Hom and Ms. Cheng,

I received an email today from David Patten of Chevron in regards a meeting we in the process of setting up. Among other issues, he indicated that you did not see the need to attend as only additional vapor sampling and perhaps the use of Retrocoat will be discussed. I wanted to make sure you were aware that the meeting is intended to also discuss potential remedial actions at the site, and that the decisions made in this discussion are likely to “temporarily” affect your use of the home. Because of those likely decisions, ACDEH does want your thoughts and input in the meeting. I would strongly encourage you to attend the meeting due to the likely conversation topics. At present we appear to be settling on April 24th at 10 – 12, although this may change to a slightly later day during that same week of April.

If you plan to attend, please let me know if this date and time will, or won't work for you. I will also keep you posted with any changes.

Should you have any questions, please let me know.

Thanks,

*Mark Detterman
