Hi Nathan,

Please use this email as approval to proceed as you have proposed; the reasons are sound and may eventually result in cost savings by simply modifying the order of actions, as well as improving the methodology of selecting the most appropriate remedial actions.

Best,

Mark,

CRA on behalf of Chevron would like to request an extension of due dates issued in Alameda County Environmental Health letter *Approval of Vapor Survey With Modifications and Request for Feasibility Study; Fuel Leak Case No. RO0000341: (Global ID # T0600100330); (3126 Fernside Blvd), 3135 Gibbons Drive, Alameda, CA 94501* dated June 24 2010.

CRA requests that the Preferential Pathway Survey and proposed vapor points due date be moved to August 20, 2010. Chevron is currently working on obtaining access to conduct environment assessment both in the house and on the property. CRA can not propose subslab vapor point locations without access into the residence.

CRA request the Feasibility Study due date be due at the same time as the Vapor Survey Report on September 20, 2010. CRA feels that the Vapor Results could determine remedial feasibility.

These dates are all dependent on when access to the property is obtained.

If there are any questions please contact me.

Regards,

**Nathan Lee, P.G.**
