 Oakland, California

Dear Mr. Chan:

Attached for your review and comment is a copy of the *Fourth Quarter 2002 Monitoring Report* for the above referenced site. Upon information and belief, I declare, under penalty of perjury, that the information contained in the attached document is true and correct.

As always, please feel free to contact me directly at (559) 645-9306 with any questions or concerns.

Sincerely,

Shell Oil Products US

Karen Petryna

Re: **Fourth Quarter 2002 Monitoring Report**

Former Shell Service Station
461 8th Street
Oakland, California
Incident #97093399
Cambria Project #245-1501-002

Dear Mr. Chan:

On behalf of Equilon Enterprises LLC dba Shell Oil Products US, Cambria Environmental Technology, Inc. (Cambria) is submitting this groundwater monitoring report in accordance with the reporting requirements of 23 CCR 2652d.

FOURTH QUARTER 2002 ACTIVITIES

Groundwater Monitoring: As recommended in our April 30, 2002 *Agency Response and Investigation Work Plan* and noted in our October 3, 2002 *Third Quarter 2002 Monitoring Report*, the sampling frequency for several site wells has been reduced. According to the current schedule, all wells will be gauged quarterly and wells S-5 and S-6 will be sampled quarterly. Wells S-8, S-9 and S-10 will be sampled semi-annually in the first and third quarters, and well S-4 will be sampled annually during the first quarter. Therefore, during the fourth quarter monitoring event, Blaine Tech Services, Inc. (Blaine) of San Jose, California gauged all site wells, checked the wells for separate-phase hydrocarbon (SPH), sampled selected site wells, calculated groundwater elevations, and compiled the analytical data. No SPH has been detected since January 1998. Cambria prepared a vicinity map which includes previously submitted well survey information (Figure 1) and a groundwater elevation map (Figure 2). Blaine's report, presenting the laboratory report and supporting field documents, is presented as Attachment A.

Oxygenate Sampling: As requested in a May 6, 2002 Alameda County Health Care Services Agency (ACHCSA) letter and stated in our June 7, 2002 *Agency Response and Work Plan Addendum*, groundwater samples collected from wells S-5, S-6 and S-8 during the fourth quarter

2002 monitoring event were additionally analyzed for tertiary amyl methyl ether (TAME), ethyl tertiary butyl ether (ETBE), di-isopropyl ether (DIPE), tertiary butyl alcohol (TBA), ethylene dibromide (EDB) and 1,2-dichloroethane (1,2-DCA or EDC) by EPA Method 8260. Analytical results are summarized on Table 1. None of the additional analytes were detected.

Suspension of Over-Purging: As noted in our October 3, 2002 *Third Quarter 2002 Monitoring Report*, Cambria recommended suspension of over-purging from wells S-5 and S-6 to determine equilibrium groundwater conditions in groundwater and to possibly collect an SPH sample. This recommendation was approved by the ACHCSA during an August 7, 2002 telephone conversation. Over-purging was not performed during the fourth quarter monitoring event, and no SPH were detected in wells S-5 and S-6. Cumulative groundwater purge volume and estimated mass removal data are presented in Table 2. The cumulative estimated mass of total petroleum hydrocarbons as gasoline and benzene removed to date is 2.22 pounds and 0.50 pounds, respectively.

Subsurface Investigation Status: Per Cambria's April 30, 2002 *Agency Response and Investigation Work Plan* and June 7, 2002 *Work Plan Addendum*, Cambria recommends both onsite and offsite investigation to determine the source of contamination detected in wells S-5 and S-6. The scope of work for this investigation was approved in a June 11, 2002 ACHCSA letter. As noted in a September 26, 2002 electronic-mail correspondence to Barney Chan of the ACHCSA, we have amended several boring and well installation locations. The amended locations are shown on Figure 2, included herein.

As noted in Cambria's December 4, 2002 *Investigation Status Report*, we are in the process of obtaining an updated access agreement for the former Shell-branded service station property. The fieldwork scheduled for September 30 through October 4, 2002, has been postponed pending access agreement resolution.

ANTICIPATED FIRST QUARTER 2003 ACTIVITIES

Groundwater Monitoring: Blaine will gauge and sample all site wells, and tabulate the data. Cambria will prepare a monitoring report.

Oxygenate Sampling: As noted above, wells S-5, S-6 and S-8 were additionally analyzed during the fourth quarter 2002 monitoring event for TAME, ETBE, DIPE, TBA, EDB and 1,2-DCA. None of the additional analytes were detected. Based on this, Cambria does not recommend further monitoring for the additional analytes. As noted in our June 7, 2002 *Agency Response and Work Plan Addendum*, grab groundwater samples collected from borings installed during the upcoming site investigation will, however, be analyzed for the additional analytes.

Suspension of Over-Purging: Wells S-5 and S-6 will not be over-purged during the first quarter 2003 monitoring event to determine equilibrium groundwater conditions in groundwater and to possibly collect an SPH sample. Cambria will reinitiate over-purging during the second quarter 2003.

Subsurface Investigation Status: As noted in Cambria's December 4, 2002 *Investigation Status Report*, we are in the process of obtaining an updated access agreement for the former Shell-branded service station property. Cambria will notify the ACHCSA when the access agreement has been secured.

					Total Gallons Removed:			0.36456			0.06793		0.00246

Abbreviations and Notes:

TPPH = Total purgeable hydrocarbons as gasoline

MtBE = Methyl tert-butyl ether

ppb = Parts per billion

gal = Gallon

NA = Not available/not analyzed

Mass removed based on the formula: volume extracted (gal) x Concentration ($\mu\text{g}/\text{L}$) x ($\text{g}/10^6 \mu\text{g}$) x (pound/453.6g) x (3.785 L/gal)

Volume removal data based on the formula: density (in gms/cc) x 9.339 (ccxlbs/gmsxgals)

TPPH, benzene analyzed by EPA Method 8015/8020

MTBE analyzed by EPA Method 8260 in bold font, all other MTBE analyzed by EPA Method 8020

Purging performed by Blaine Technologies of San Jose, California

If concentration is less than the laboratory detection limit, one half of the detection limit concentration is used in the mass removal calculation.

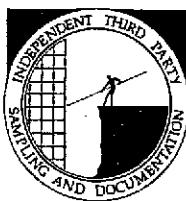

* = Well inaccessible

Monitoring performed on October 15 and 17, 2002

Groundwater Monitoring Report **021015-DA-3**

This report covers the routine monitoring of groundwater wells at this Former Shell facility. In accordance with standard procedures that conform to Regional Water Quality Control Board requirements, routine field data collection includes depth to water, total well depth, thickness of any separate immiscible layer, water column volume, calculated purge volume (if applicable), elapsed evacuation time (if applicable), total volume of water removed (if applicable), and standard water parameter instrument readings. Sample material is collected, contained, stored, and transported to the laboratory in conformance with EPA standards. Purgewater (if applicable) is, likewise, collected and transported to the Martinez Refining Company.

Basic field information is presented alongside analytical values excerpted from the laboratory report in the cumulative table of **WELL CONCENTRATIONS**. The full analytical report for the most recent samples and the field data sheets are attached to this report.

At a minimum, Blaine Tech Services, Inc. field personnel are certified on completion of a forty-hour Hazardous Materials and Emergency Response training course per 29 CFR 1910.120. Field personnel are also enrolled in annual eight-hour refresher courses.

Blaine Tech Services, Inc. conducts sampling and documentation assignments of this type as an independent third party. Our activities at this site consisted of objective data and sample collection only. No interpretation of analytical results, defining of hydrological conditions or formulation of recommendations was performed.

Please call if you have any questions.

Yours truly,

Leon Gearhart
Project Coordinator

WELL CONCENTRATIONS
Former Shell Service Station
461 8th Street
Oakland, CA

Well ID	Date	TPPH (ug/L)	B (ug/L)	T (ug/L)	E (ug/L)	X (ug/L)	MTBE 8020 (ug/L)	MTBE 8260 (ug/L)	TOC (MSL)	Depth to Water (ft.)	GW Elevation (MSL)	SPH Thickness (ft.)
---------	------	----------------	-------------	-------------	-------------	-------------	------------------------	------------------------	--------------	----------------------------	--------------------------	---------------------------

Abbreviations:

TPPH = Total petroleum hydrocarbons as gasoline by EPA Method 8260B; prior to July 25, 2001, analyzed by EPA Method 8015.

BTEX = Benzene, toluene, ethylbenzene, xylenes by EPA Method 8260B; prior to July 25, 2001, analyzed by EPA Method 8020

MTBE = Methyl-tertiary-butyl ether

TOC = Top of Casing Elevation

TOB = Top of Wellbox Elevation

SPH = Separate-Phase Hydrocarbons

GW = Groundwater

ug/L = Parts per billion

MSL = Mean sea level

ft = Feet

< n = Below detection limit

D = Duplicate sample

NA = Not applicable

Notes:

a = Ethylbenzene and xylenes combined.

b = This sample analyzed outside of EPA recommended holding time.

c = Depth to water measured from Top of Casing; elevation unknown.

d = Grab sampled.

* = Prior to December 22, 1994, well elevations taken from Top of Casing.

Beginning July 18, 2002, well elevations taken from Top of Casing.

Site surveyed March 5, 2002, by Virgil Chavez Land Surveying of Vallejo, California.

Leon Gearhart
Blaine Tech Services
1680 Rogers Avenue
San Jose, CA 95112-1105

Subject : 1 Water Sample
Project Name : 461 8th Street, Oakland
Project Number : 021017-MT2
P.O. Number : 97093399

Dear Mr. Gearhart,

Chemical analysis of the samples referenced above has been completed. Summaries of the data are contained on the following pages. Sample(s) were received under documented chain-of-custody. US EPA protocols for sample storage and preservation were followed.

Kiff Analytical is certified by the State of California (# 2236). If you have any questions regarding procedures or results, please call me at 530-297-4800.

Sincerely,

A handwritten signature in black ink that reads "Joel Kiff".

Joel Kiff

Subject : 2 Water Samples
Project Name : 461 8th Street, Oakland
Project Number : 021015-DA-3
P.O. Number : 97093399

Dear Mr. Gearhart,

Chemical analysis of the samples referenced above has been completed. Summaries of the data are contained on the following pages. Sample(s) were received under documented chain-of-custody. US EPA protocols for sample storage and preservation were followed.

Kiff Analytical is certified by the State of California (# 2236). If you have any questions regarding procedures or results, please call me at 530-297-4800.

Sincerely,

A handwritten signature in black ink that reads "Joel Kiff".

Joel Kiff
