RE: **Former Thrifty Oil Co. Station #054**  
**TOSCO Station #2602486**  
 2504 Castro Valley Boulevard  
 Castro Valley, CA  
**3rd Quarter 2003, Status Report**

Dear Mr. Gholami:

Presented herein is the Third Quarter 2003, Status Report prepared for Former Thrifty Oil Co. (Thrifty) Station #054 located at 2504 Castro Valley Boulevard, Castro Valley, California (**Figure 1**). This report presents the results of the groundwater monitoring activities conducted during the third quarter of 2003. Thrifty has retained the services of Earth Management Company (EMC) to conduct quarterly groundwater monitoring and sampling activities at this site.

### Groundwater Monitoring

Depth to groundwater is measured in each monitoring well quarterly. Historic groundwater gauging data obtained from April 11, 1988 through September 4, 2003, is presented in **Table 1**. In general, groundwater occurs beneath the station at depths ranging from 4.21 feet below ground surface (bgs) in monitoring well RS-9 to 7.85 feet bgs in monitoring well RS-11 (**Appendix A**). A groundwater elevation contour map based on the September 4, 2003 data is presented in **Figure 1**. Groundwater elevation data indicates that the general direction of groundwater flow beneath the site is toward the southeast with a hydraulic gradient of approximately 0.0636 feet/foot.

### Quarterly Groundwater Sampling

As part of the ongoing groundwater-monitoring program, groundwater samples were obtained from selected monitoring wells PW-1, RE-2, RE-3, RE-4, RE-6, RE-7, RS-9, and RS-11 on September 4, 2003. In a letter from the Alameda County Health Care Services (ACHCS) dated November 6, 2001, the ACHCS released Thrifty from collecting groundwater samples from wells PW-2, RE-1, RE-5, RS-8, and RS-10 until further notice.

Groundwater samples were obtained by EMC and delivered in a chilled state in an ice chest following strict Chain-of-Custody procedures to a state-certified laboratory. The samples were analyzed for total petroleum hydrocarbons as gasoline (TPHg) by EPA Method 8015M for gasoline and for benzene, toluene, ethylbenzene, xylenes (BTEX) and methyl tert-butyl ether (MTBE) by EPA Method 8021B. Copies of the EMC Field Status Reports are presented in **Appendix A**, and copies of the laboratory analytical reports are contained in **Appendix B**.

TPHg, BTEX, and MTBE concentrations appear in **Table 1**, and **Appendix B**. TPHg, benzene, and MTBE isoconcentration maps are presented in **Figures 2, 3, and 4**, respectively. The highest laboratory analytical concentrations for TPHg and MTBE were found in monitoring well RS-9 (117 ug/L and 8.3 ug/L, respectively). Benzene concentrations were below the laboratory detection limit in all groundwater wells sampled. Thrifty again reiterates that well RS-9 is located up gradient of the Thrifty site, and contamination found in this well probably originated from an up gradient off-site source. TOSCO Marketing Company is the current operator of the service station, acquiring the lease from BP Oil, who previously leased the property beginning on July 10, 1991. **Due to the low TPHg, benzene, and MTBE concentrations in all monitoring wells, Thrifty respectfully requests your consideration for closure of Thrifty Station #054 located at 2504 Castro Valley Boulevard, Castro Valley, California.**

#### Other Activities

Thrifty has retained Morrow Surveying of West Sacramento, California, to resurvey the groundwater monitoring wells located on- and offsite. The results of the survey will be provided in the 4th Quarter 2003 report.

Thrifty will continue the groundwater monitoring, gauging, and sampling events at this site on a quarterly basis. All interpretations expressed in this report are based solely upon the review of data collected by EMC and laboratory analyses by Associated Laboratories.

Respectfully submitted,

Michael H. Bowery, R.G.  
Project Manager

Chris Panaitescu  
General Manager  
Environmental Affairs

COMMENTS

This laboratory request covers the following listed samples which were analyzed for the parameters indicated on the attached Analytical Result Report. All analyses were conducted using the appropriate methods as indicated on the report. This cover letter is an integral part of the final report.
