Hi Kiersten,

I had thought one more quarter of quarterly monitoring would be warranted, but I've just revisited the data and agree that semi-annual in the 1<sup>st</sup> and 3<sup>rd</sup> quarters is appropriate for the site. You can use this email to document the elimination of the Second and Fourth Quarter 2017 groundwater monitoring events; they have also been removed from Geotracker as an deliverable.

In regards to the Dilution – Attenuation Analysis request, we haven't recommended a specific one.

Hi Mark,

In your June 9, 2017 letter you list due dates for the 2Q, 3Q, and 4Q 2017 quarterly groundwater monitoring reports. It's my understanding this site is now on semi-annual sampling (1<sup>st</sup> and 3<sup>rd</sup> quarters) in alignment with California State Water Resources Control Board Resolution No. 2009-0042 since groundwater has been monitored and sampled for 32 years (since 1985).

Additionally in the letter you request a dilution attenuation analysis. Does ACDEH have a specific guidance you'd like us to use?

Thank you,  
Kiersten
