**Subject:** RE: RO350 - Delay in Soil Vapor Field work

Kathy,  
I'll extend the submittal date to June 18<sup>th</sup> in order to formalize an extension request for Geotracker purposes. I'll look for the data submittals in the near future. It takes a day or three to appear on Geotracker for checking.

Thanks,

*Mark Detterman*

Mark,

Uploading the EDF and GEO\_Well today.

The sampling was completed May 10<sup>th</sup> and we are waiting on the lab reports. We should have the report completed by mid-June the latest.

Kathy

Kathy,

What's the status of this work? An extension for the report due date was not requested (that I can find), but I'm aware work is in progress. Also, the March groundwater monitoring report does not have an EDF or GEO\_WELL submittal to Geotracker. I'll need to reject the gw report if one is not uploaded shortly. Keep me posted.  
Thanks,

**Subject:** RO350 - Delay in Soil Vapor Field work

Mark,

As you know the soil vapor probe installation and sampling (per the 2017 Work Plan) was scheduled to start today. With the rainfall volume yesterday and the predicted rain for the remainder of this week, we decided to postpone the event until we have clear weather. Once we have a new date we will notify ACEH. The current driller availability with the predicted weather is May 3.

Please let us know if you have any questions.

Kathy
