

Detterman, Mark, Env. Health

Subject: RO350 Chevron 9-5607; Crow Canyon Rd
Entry Type: Meeting

Start: Thu 7/18/2013 9:50 AM
End: Thu 7/18/2013 10:20 AM
Duration: 30 minutes

Meet with Nina and Alina Sobinina in regards to the corrective actions that Chevron plans at the site. Their home backs on the site from the east and they have concerns in regards to noise and length of time the remediation will run for (both daily and until completion). The bedroom for the house is in the back most corner, closest to the former station, and closest to the proposed groundwater treatment system. They have been waiting for the real estate market to return to sell and have been thinking of selling in the near term. This will affect that ability. I encourage them to get their comments in writing (an email works fine). They have several suggestions for other places on the site that might work that are further from the home. I encouraged them to copy all three of us listed as contacts on the public notice, and also let them know the comment period has been extended due to the error on the first copy, where the end date of the period was not updated before it was sent out. A new flyer was mailed on Monday.
