Re: Chevron Service Station # 9-3864

Address: 5101 Telegraph Avenue, Oakland, CA

I have reviewed the attached report titled Monitoring and Sampling Reduction Request  
and dated November 19, 2004.

I agree with the conclusions and recommendations presented in the referenced report. The information in this report is accurate to the best of my knowledge and all local Agency/Regional Board guidelines have been followed. This report was prepared by Cambria Environmental Technology, Inc., upon whose assistance and advice I have relied.

This letter is submitted pursuant to the requirements of California Water Code Section 13267(b)(1) and the regulating implementation entitled Appendix A pertaining thereto.

I declare under penalty of perjury that the foregoing is true and correct.

Sincerely,

Karen Streich  
Project Manager

Re: **Monitoring and Sampling Reduction Request**  
Former Chevron Service Station 9-3864  
5101 Telegraph Avenue  
Oakland, California

Dear Mr. Chan:

On behalf of Chevron Environmental Management Company (Chevron), Cambria Environmental Technology, Inc. (Cambria), is submitting this Request for Monitoring and Sampling Reduction for the site referenced above. Upon review of the second semi-annual monitoring and sampling report prepared by Gettler-Ryan (Attachment A) Cambria requests to discontinue sampling in three off-site monitoring wells. A brief description of site status is followed by Cambria's proposed change to the monitoring and sampling schedule.

**Groundwater Conditions:** Historically, depth to groundwater has fluctuated between approximately 6 feet below grade (fbg) and 18 fbg. Groundwater consistently flows southwest. Figure 1 in Attachment A presents the current potentiometric data.

**Hydrocarbon Distribution:** On-site well C-3 and down-gradient well MW-3 consistently contain the highest hydrocarbon concentrations. Maximum total petroleum hydrocarbons as gasoline (TPHg) concentration this quarter was detected in C-3 at 3,200  $\mu\text{g/L}$ . Concentrations in both wells are decreasing slightly, and these are the only wells containing hydrocarbons. No hydrocarbons have been detected in monitoring wells MW-1, MW-2, and MW-5 for ten years or more. Therefore, Cambria requests eliminating sampling in MW-1, MW-2, and MW-5. We will continue monitoring and sampling wells C-3 and MW-3 on the current semi-annual schedule. The following table depicts the current and proposed changes to the monitoring and sampling schedule.

**Cambria  
Environmental  
Technology, Inc.**

C A M B R I A

**Monitoring and Sampling Schedule**

	<b>Current Quarter</b>	<b>Proposed Quarter</b>
<b>C-3</b>	1,3	1,3
<b>MW-1</b>	1	Discontinue
<b>MW-2</b>	1	Discontinue
<b>MW-3</b>	1,3	1,3
<b>MW-5</b>	1	Discontinue

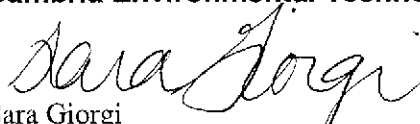

**SCHEDULE AND CLOSING**

Cambria will eliminate these wells from the sampling schedule and carry out the scope of work proposed in our September 17, 2004 Investigation Workplan upon receiving written approval from the ACHCS.

Please contact Ms. Sara Giorgi (ext. 103) or Mr. Bruce Eppler (ext. 102) at (916) 630-1855 with any questions or comments regarding the site or this work plan.

Sincerely,

**Cambria Environmental Technology, Inc.**
