DATE: 4/30/91

TO: Matt Yarns
AGIBS

FROM: Don Brown/Mark Weston

Number of Pages (including Cover): 1

SUBJECT: EB-1/EB-2, 1801 East Colfax Rd., Denver Valley

It appears that proposed boring EB-1 cannot be drilled unless it was manually positioned due to the presence of an overhead light and the station sign. KEM therefore proposes a field meeting with yourself, representatives of KEM, the drilling contractor, and Parshall Construction to determine a possible alternative location for EB-1. Drilling activities are scheduled for May 7, 1991. This date would be the most favorable date for the meeting to occur so that EB-1 can be drilled and sampled at a location satisfactory to you.

5-1-91

I left the placement of EB-1 up to the professional discretion of Kaprealian Engineering. I communicated this to Don Brown, and also that I would not be able to attend the May 7 drilling date on-site. SOS

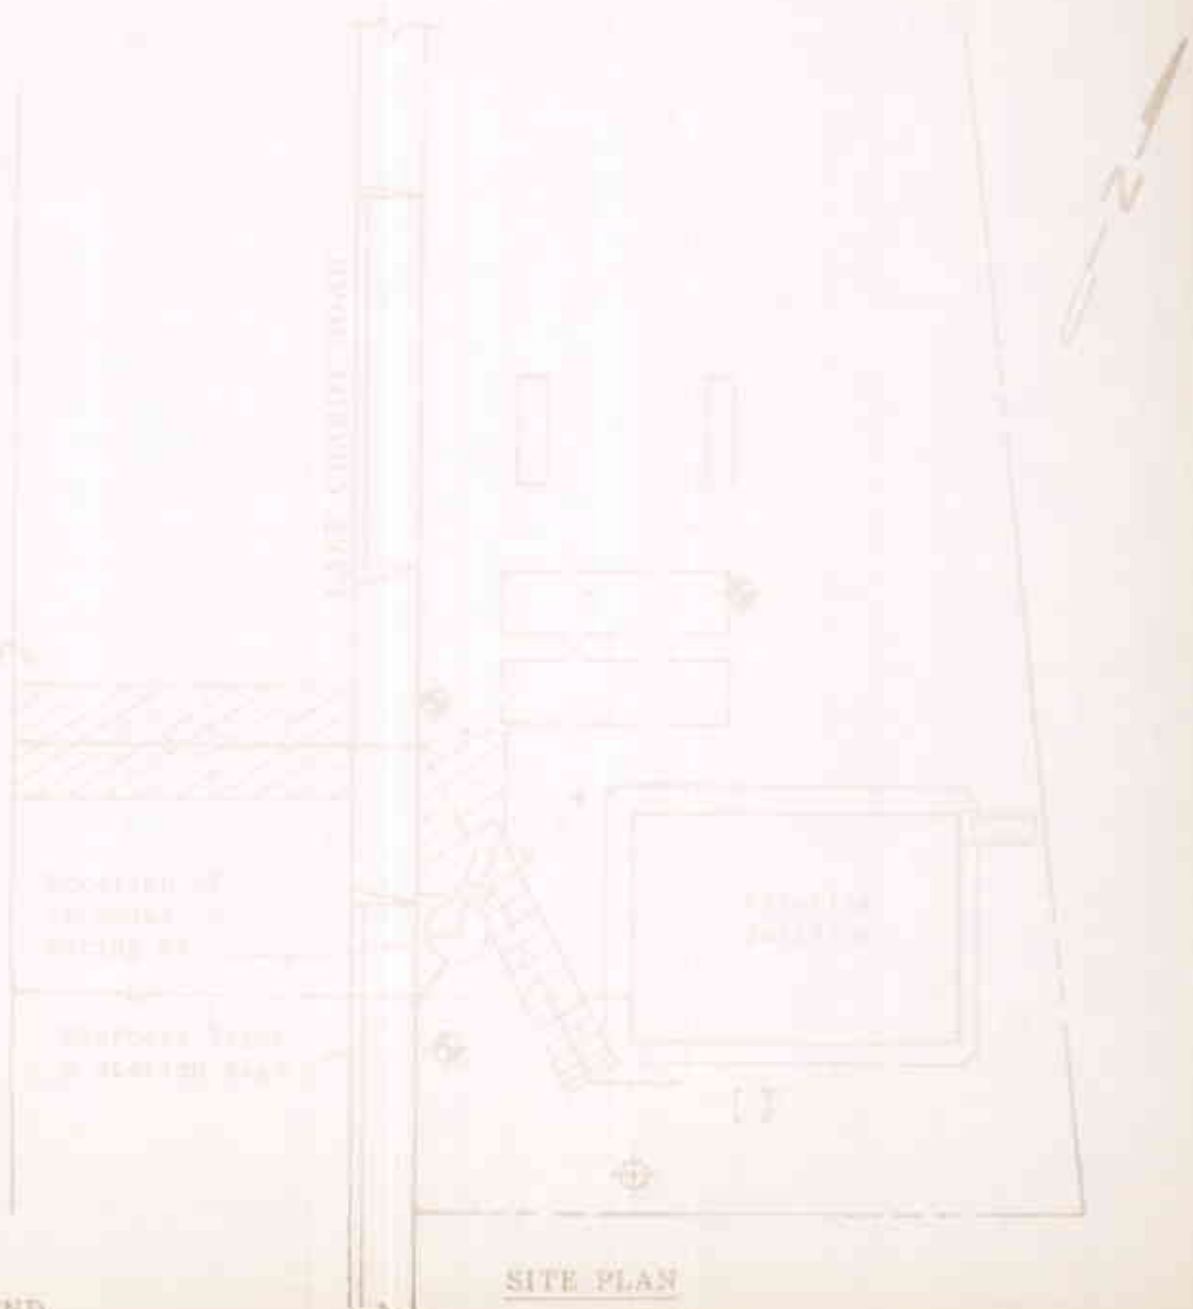

If any problems occur in receiving, please call the number listed above.
