Subject: Confirmation of 12.10.09 Phone Conversation regarding 725 Julie Ann Way

Hi Paresh,

This email is to confirm our phone conversation earlier today regarding the former Penske site at 725 Julie Ann Way in Oakland (RO0354).

Due to the upcoming holidays and the unavailability of drilling companies, we will not be able to replace the two wells and have all the wells sampled in the fourth quarter 2009. We discussed other options and you agreed to postponing the scheduled site groundwater sampling from 4th quarter 2009 to 1st quarter 2010 to allow for well replacement in early January 2010. After our conversation I contacted the drilling company and have scheduled the drilling for Monday, January 11th. We plan to have all the wells sampled by the end of January and will conduct quarterly sampling for the rest of 2010.

Thanks for putting the investigation report and work plan review on your to do list. If we can get the work plan approval by December 18th that will help us finalize the drilling and sampling schedule for January.

Please let me know if you have any questions about the documents or changes to this email.

Eva
