Mr. Dettloff,

Your extension request to July 18, 2014 is approved. Does the station demolition schedule accommodate the well destruction?

Regards,  
Keith Nowell

Mr. Nowell:

Thank you for your response and comments indicated below. We are currently in the process of permitting the well destruction of the site wells. However, the drillers are currently booked a month to a month and a half out right now so the June 24<sup>th</sup> deadline for the well destruction report is not feasible. A more realistic time for well destruction would be the middle of July with a report to be submitted 30 days after the completion of the field activities. Don't hesitate to contact me if you have any questions.

Regards,

Dear Mr. Ralston,

Alameda County Environmental Health (ACEH) has reviewed the recently submitted document entitled *Work Plan- Well Destruction and Replacement* (WP) dated May 21, 2014 prepared by Antea Group (ANTEA) on your behalf. ACEH agrees with the well destruction as described in the WP but is of the opinion monitoring well replacement should be determined after the interim removal action has been performed.

The proposed well destruction may be implemented. Replacement well installation may be addressed in the removal action report or submitted under separate cover as a replacement well installation work plan. Please schedule and complete the fieldwork activities by the date specified below and provide ACEH with at least three (3) business days notification prior to

conducting the fieldwork. Upon completion of the well destruction, please provide ACEH with documentation of the well destruction and removal of destruction derived waste.
