**SUBJECT Notification of Field Activities**  
Former Exxon Service Station 70235  
2225 Telegraph Avenue, Oakland, California

Mr. Truong:

At the request of ExxonMobil Environmental Services (EMES), on behalf of Exxon Mobil Corporation, Cardno ERI is notifying you of a feasibility test to be performed at the subject site. The feasibility test will be conducted for approximately one week. Testing equipment is scheduled to arrive on site on January 13, 2014. Testing will occur from January 13 through 17, 2014. Wells MW6B, MW6H, MW6Ka, MW6Kb, MW6La, and MW6Lb will be used as the extraction wells. Well locations are illustrated on the attached Generalized Site Plan.

During testing activities, a mobile remediation system and generator will be operated at the site site. Extracted groundwater from testing activities will be placed in a separate water storage trailer and stored at the site in an area that will not block driveways. Testing equipment, including the water storage trailer, is tentatively scheduled for removal on January 17, 2014.

Cardno ERI appreciates your cooperation in ensuring that field work occurs safely and efficiently. Cardno ERI will minimize disruptions to station operations while on site. Please contact Ms. Rebekah Westrup, Cardno ERI's project manager for this site, at [rebekah.westrup@cardno.com](mailto:rebekah.westrup@cardno.com) or (707) 766-2000 with any questions.

Sincerely,

SCANNED
