Subject: RE: RO#359 Request to Augment Groundwater Monitoring Program

Mr. Robison,

ACEH concurs with your request to sample only MW-7, MW-8 and MW-6, if accessible. However, please ensure that all available wells are gauged so an accurate water contour can be drawn.

Regards,

Barb Jakub

Subject: RO#359 Request to Augment Groundwater Monitoring Program

Dear Ms. Jakub,

Buttner Properties would appreciate the opportunity to appeal your decision regarding the December groundwater monitoring event for 2250 Telegraph Avenue. Groundwater monitoring, which includes wells MW-3 and MW-4, has been continuously conducted at the site for more than 15 years (1994 to present). The testing results from MW-3 and MW-4 have always been consistent and we believe that nothing new will be found. Each monitoring event costs approximately \$5000.

We would appreciate it, if the December groundwater monitoring event could be limited to wells MW-7 and MW-8 and MW-6, if accessible.

Thank you for your consideration.

Tim Robison
Buttner Properties

Subject: RE: RO#359 Request to Augment Groundwater Monitoring Program

For the December event please analyze wells MW-3, MW-4, MW-7, MW-8 and MW-6 if you can obtain access. I expect to review the CAP before the 1Q12 monitoring event and will review and comment on the proposed groundwater monitoring after that review.

Regards,
Barb Jakub

Subject: RO#359 Request to Augment Groundwater Monitoring Program

Hi Barbara-

As discussed with you earlier today, on behalf of Buttner Properties, we are requesting to augment the groundwater monitoring program at the 2250 Telegraph Avenue site as follows:

- o Buttner Properties will complete groundwater monitoring at wells MW-7 and MW-8 for the next two quarters (to be completed in December 2011 and March 2012) as directed by the County. No other wells will be monitored during these next two events.
- o Buttner Properties further requests to discontinue groundwater monitoring of all wells at the site after the March 2012 sampling event until after the completion of remediation at the site as proposed in our Corrective Action Plan dated November 21, 2011.

On behalf of Buttner Properties., we thank you in advance for your timely response to this request. We have tentatively scheduled the next groundwater monitoring event for the week of December 12, 2011.

Best regards,

Karen A. Emery, P.G.
Senior Project Geologist
